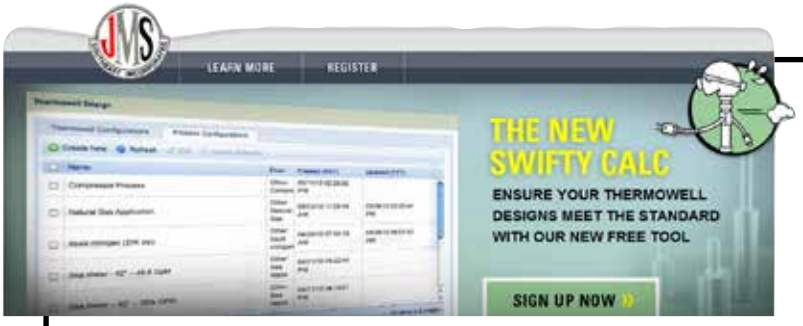
WELCOME TO JMS SOUTHEAST!

Swifty Sensor

Home of the next day *Swifty Sensor Service* and the New ***SwiftyCalc***!

What sets JMS apart from the average temperature sensor manufacturer?

It's all the "extras" we provide to ensure customer satisfaction. Such as our unique 24 hour delivery service of products called ***Swifty Sensor Service***. Have an emergency? Need it overnight? We will manufacture whatever your need may be to get you out of that "situation". This is at NO extra charge to you.



DESIGN THERMOWELLS THAT LAST AND EXTEND THE LIFE OF YOUR TEMPERATURE SENSORS WITH JMS SwiftyCalc!

In 2010, **the only US Standard** regarding the strength of thermowells had its first significant revision in **35 years**. New geometries, new requirements, new capabilities and more than 40 new pages of math and physics calculations to boot in the ASME PTC 19.3-TW (2010). In 2016 the standard was further updated in ASME PTC 19.3TW-2016.

Your objective? To ensure your thermowell designs meet the standard.

Your tool? ***SwiftyCalc.*** Now *free* from JMS Southeast, Inc. to registered users.

The JMS SwiftyCalc software quickly provides you with a thermowell design based upon your material requirements and process variables meeting the ASME PTC 19.3TW standard. Save your results to your own account and return later to modify on the fly. JMS SwiftyCalc also provides you with instant theoretical maximums for insertion length. SwiftyCalc is perfect for faster response time and increased reliability in your temperature measurement system. Push a button and generate fully developed data sheets.

Need to develop a quick budget for your temperature application project? Push a button and get pricing from a friendly and knowledgeable JMS sales engineer.

To sign up for SwiftyCalc, register at www.jms-se.com/SwiftyCalc or call 1.800.873.1835

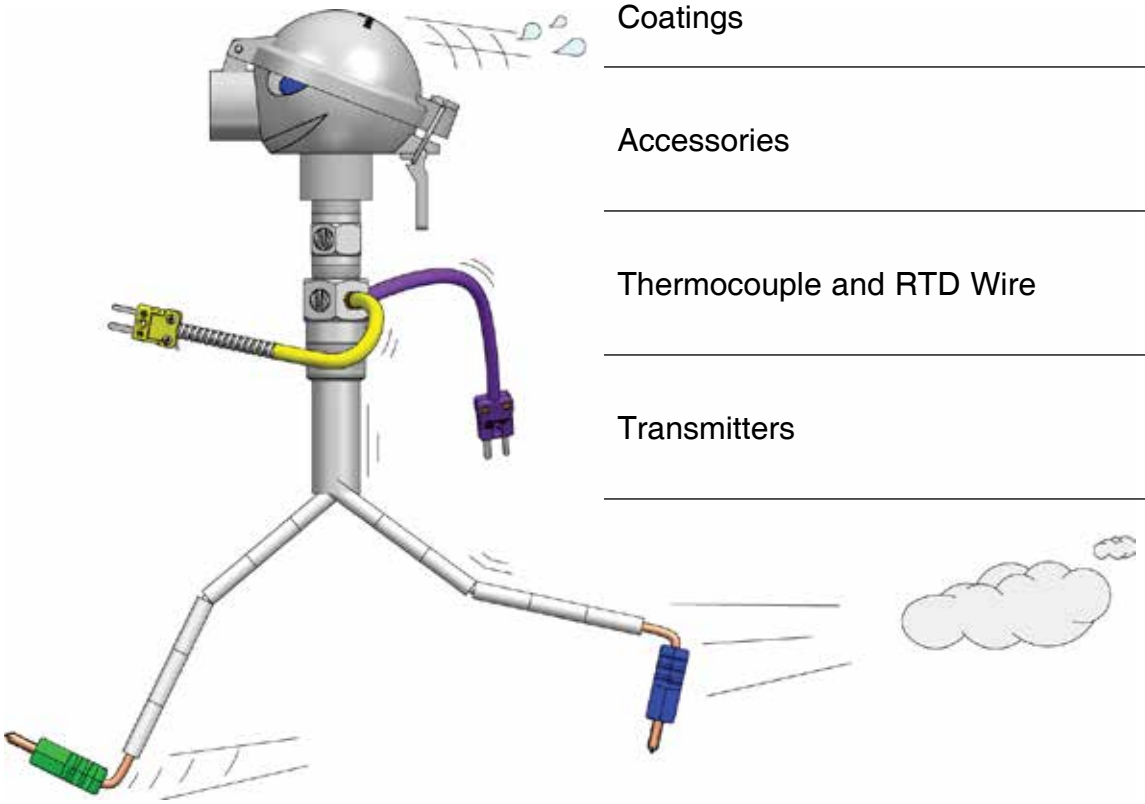
Swifty Sensor



Due to space limitations we have excluded some part number selections from publication. Additional selections are available via JMS catalog cut sheets posted at www.JMS-SE.com. It is the final reference for JMS part numbers. Custom products are also available with drawings to suit your application. Call 1-800-873-1835 or email Sensors@JMS-SE.com for more information.

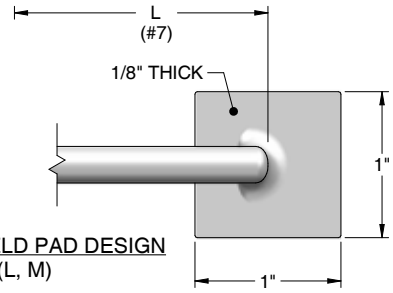
INDUSTRIAL AND MINIATURE THERMOCOUPLES

#1	DESCRIPTION [6, 7]
1	Thermocouple

#2	TYPE [8,9,10]
____	J,T,K,E,N,X (Other, Specify)

Many more options available at JMS-SE.com

#3	LIMITS OF ERROR/ELEMENT CONSTRUCTION			
1	Standard	Single	6	Standard Triple
2	Standard	Dual	X	Other, specify
3	Special	Single		
4	Special	Dual		



WELD PAD DESIGN
#6 (L, M)

#4	OUTSIDE DIAMETER [1-11]	CONDUCTOR SIZE (FOR BASE METALS ONLY) SINGLE (AWG) DUAL (AWG)								
	OD	Single	Dual		OD	Single	Dual		OD	Single	Dual
P	1/2"	10	12	R	6mm	16	18	F	1/25"	32	34
A	3/8"	13	16	C	3/16"	19	20	X*	Other, specify		
Y	5/16"	14	16	D	1/8"	22	24				
B	1/4"	16	18	E	1/16"	28	30				

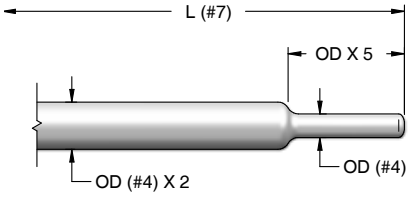
*JMS now offers sheath as small as 0.010" diameter

Note: For hollow tube sensors or sensors requiring a factory bend, see pages 2-1 and 2-2.

#5	SHEATH MATERIAL [11]	MAX °F	[2-8, 4-17]		MAX °F
H	304 stainless steel	1650	C	Teflon coated stainless steel	400
J	310 stainless steel	2100	S	Titanium	400
V	STABALOY	2220	Q	Hastelloy C-276	800
K	316 stainless steel	1650	P	Pyrosil	2300
M	Inconel 600	2100	X	Other, specify	___

[ ] Brackets indicate page numbers where additional helpful information can be found in technical catalog. Now available online at www.JMS-SE.com/TechnicalCatalog

REDUCED TIP DESIGN
#6 (P,Y)

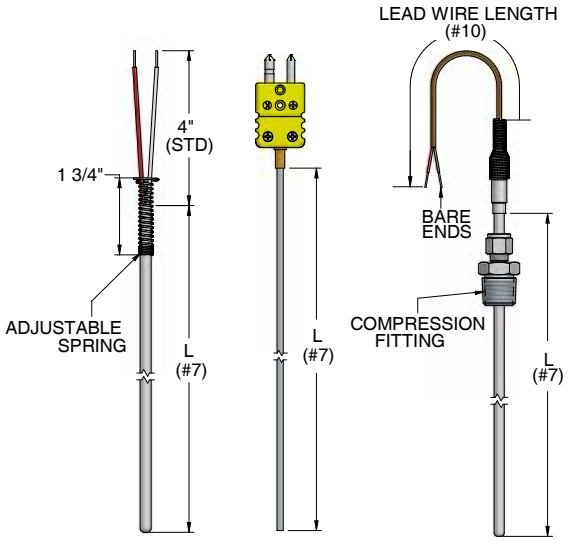


#6	MEASURING JUNCTION [1-12, 13, 14, 15]		
G	Grounded	P	Reduced tip, grounded
U	Ungrounded	Y	Reduced tip, ungrounded
E	Exposed (isolated on dual/triple)	R	Gas/air, exposed
I	Isolated	S	Gas/air, grounded
J	Pointed tip, grounded 45°	T	Gas/air, ungrounded
K	Pointed tip, ungrounded 45°	V*	Enlarged tip, grounded
L	Weld pad, grounded (Flat)	W*	Enlarged tip, ungrounded
M	Weld pad, ungrounded (Flat)	X	Other, specify
N	Weld pad, removable grounded		
O	Weld pad, removable ungrounded		
NF	Removable, "foot" only, grounded		
OF	Removable, "foot" only, ungrounded		

*Provide length and enlarged diameter description when selecting these options.

Note: For options N, NF, O, & OF Fastrax (aka removable weld pad) designs, refer to 4-11.

#7	LENGTH (See illustrations on page 1-1 through 1-3 for lengths)
____"	Length in Inches (Lengths greater than 90" may be coiled for shipment)



Note: L is the overall length of the sensor to the transition, wire, plug, head, or fixed attaching device. L excludes non-fixed attaching devices.

NEW Skip to page 1-3 to complete selection #8 if your sensor requires a nipple and/or union extension.

#8	STANDARD INDUSTRIAL ATTACHING DEVICE [1-3, 6-13]		
X	Other, specify		
Z	N/A	No attaching device	
G	Single thread (process)	Welded design	
F	Single thread (reversed)		
W	Double threaded		
H*	SS w/ SS ferrule	Compression design	
I*	SS w/ Teflon ferrule		
J*	SS w/ Lava ferrule		
K*	SS w/ Nylon ferrule		
L*	Brass w/ Brass ferrule		
D	Single threaded (process)	Spring-loaded design	
C	Double threaded w/ oil seal		
A	Double w/ threaded retainer		
E	Adjustable spring		
S	Double threaded (most common)		
B	Double threaded Bayonet		
BS*	Double threaded Bayonet w/ oil seal		
BD	Single threaded Bayonet		
BDS*	Single threaded Bayonet w/ oil seal		

*For double threaded use a 2 suffix along with your selection. Example: H2

Note: High nickel proprietary spring material is rated to 1000°F (for 1/4" Ø Sensors)

* Not recommended for sensors Ø > 1/4"

1	J	1	B	H	G	12"	S

OR { S | U | N | 6" | H | 1 }

SEE PAGE 1-3

INDUSTRIAL AND MINIATURE THERMOCOUPLES

#9 PROCESS CONNECTION SIZE & TYPE [1-3]

Note: Threaded bushing may be used for sizes larger than 1/2" NPT

L	1/8" NPT	O	3/4" NPT	X	Other, specify
M	1/4" NPT	J	1" NPT	Z	N/A
A	3/8" NPT	T	1 1/4" NPT		
P	1/2" NPT (Standard) w/ symbols W,S,C, & N from selection #8	Y	1 1/2"NPT		

#10 LEAD WIRE TYPE & LENGTH IN INCHES [SEE SECTION 7]

Z	No lead wires	7__"	Bare wire (AWG per #4)
1__"	Fiberglass braid	8__"	PVC coil cord (Relaxed length) (4" standard length for in head bayonet sensors)
2__"	PVC	S9__"	Teflon ultra premium Type T, stranded 22 AWG
3__"	Teflon	X__"	Other, specify
4__"	Hi-temp fiberglass braid		
5__"	Kapton		

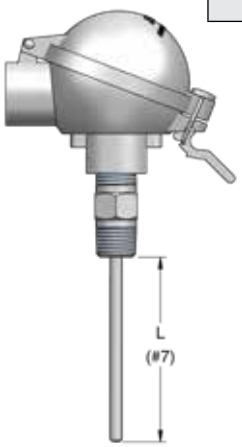
} Solid 20 AWG

Note: Add an S prefix to your selection to designate stranded wire. Preferred for high vibration applications with lead wires > 6". Example: S312= 12" stranded Teflon lead wire. 24 AWG or smaller may be used to accommodate some smaller diameters and flex armor extensions.

#11 ARMOR OR HEAT SHRINK [7-7,16]

A special armor adapter is used when flex armor is longer than 60".

A	SS flex armor	J	Aluminum mylar shielded and jacketed to match primary insulation
B	SS flex armor teflon coated white	Z	N/A
C	SS flex armor teflon coated black	K	SS overbraid, drain, & yellow Teflon jacket overall, 20 AWG stranded (Type K only)
D	Small 1/8" ID SS flex armor	X	Other, specify
F	SS overbraid		
G	Heat shrink/sleeving		
H	Jacket to match primary insulation		



#12 TYPE OF TRANSITION [1-16]

H	Heat shrink
S	Size on size
T	3/8" OD or larger (Standard)
R	1/4" OD
X	Other, specify
Z	No transition

Note: For high humidity/moisture environments (≤ 500˚F), put a 2 after your selection. For example, R2.

Note: For high temperatures at the transition area (500°F - 1200°F), put a 3 after your selection. For example, T3.

#13 COLD END TERMINATION

Choose as many as applicable (Additional options see Pg. 1-7)
(Visit our online catalog for additional terminations, www.JMS-SE.com/ends)

Connectors

B	Miniature plug
C	Standard plug
F	High temperature plug (< 800˚F)
WM	Microphone style plug (6DA)
D	Miniature jack
E	Standard jack
G	High temperature jack (<800˚F)
WF	Microphone style jack (6DA)

Transmitters

8H	Isolated transmitter
8N	Non-isolated transmitter
8I	Hart protocol
8E	Intrinsically safe
8D	Hart/intrinsically safe
8PS	Indicating with SS Exp. housing
8PA	Indicating with Alum Exp. housing

Note: Add span range after transmitter selection. Example: 8H(0-200C). Transmitter output=4-20mA. (See section 8 for other options).

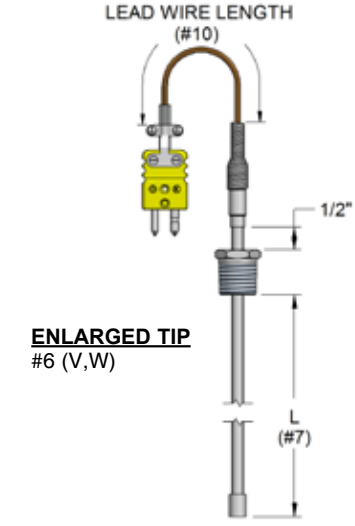
Heads [6–1] visit www.JMS-SE.com/headspecs

Exp. Proof	I	Aluminum, NEMA 4X, FM, CSA, IP68 (6IA)
	J	316 SS, NEMA 4X, FM, CSA, IP68 (6ISS)
	P	Aluminum, NEMA 4X, FM, CSA, ATEX, IECEx, IP68 (6IAIEC)
	SI	Cast Iron, NEMA 4, UL, CSA (6I)
Gen. Purpose	L	Aluminum w/ hinged cover (6L)
	M	Aluminum w/ screw cover & chain (6M)
	R	Aluminum w/ hinged high dome cover (6R)
	N	Cast Iron w/ screw cover (6N)
	Q	Black plastic (6Q)
	SS	316 SS w/ screw cover & chain (6SS)

Other

A	Bare ends
K	Spade lugs (6SL)
O	Open terminal block (6B4)
X	Other, specify

Note: L is the length of the sensor to the fixed attaching device.



ENLARGED TIP
#6 (V,W)

#14 OPTIONS

Use only if applicable [INTRODUCTION]

Marking / Tagging

1	Stainless steel tag
2	Plastic tag
3	Paper tag
4	Laser etch on probe
7	CE marking [page XV]
T	Calibration Tag

Calibration Options

5	Calibrate at specified point(s). Corrections data provided for each point.
5L*	Standard lot calibration
5M	Material calibration report.
6**	Premium calibration report. Corrections data will be provided for temperatures within the range.
6L	Premium lot calibration report. Corrections data will be provided for temperatures within the range.

Certifications

8***	Guide 17025 calibration certification
M	MTR (sheath / tubing / measuring junction components)

Other Options

B	Head mounting bracket
S	Ship straight (Do not coil)
X	Other, specify

* AMS 2750D/E/F compliant
** Must specify increments & range (Example: 0 to 300°F, 10° increments)
*** Must choose calibration option other than 5M

P	Z	Z	Z	L	1

COMPLETE PART NUMBER EXAMPLES

- With nipple-union-spring-loaded extension assembly: **1J1BHG12"S[UN6H1]PZZZL1**
- Without extension assembly: **1J1BHG12"SPZZZL1**

CUSTOM NIPPLE/UNION EXTENSION CONFIGURATOR

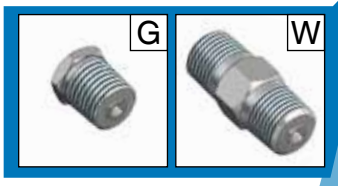
An extension assembly provides extra length extending the sensor head past insulation and away from heat. Standard unions are 1/2" FNPT on both ends. The union joins two nipples in an extension assembly and has a standard pressure rating of 150 PSIG.

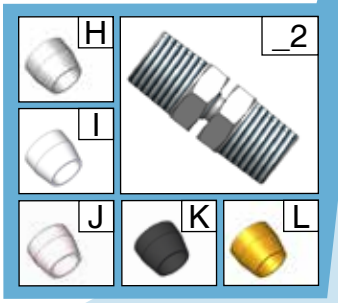
When a nipple-union-nipple assembly is selected and spring-loading of the thermocouple element is required, there are two different methods of spring-loading the sensor. JMS's standard, recommended method is to use the machined 1/2" x 1/2" NPT spring-loaded stainless steel fitting as one of the nipples. With this design, the probe is secured within the fitting and mounted to the head in a rigid manner instead of spring-loading against a terminal block, as is the case with a standard nipple-union-nipple. Due to stress exerted by spring, selection #8, option N "nipple" should never be used with an in-head transmitter. Any of the other options within option #8 are compatible with in-head transmitters.

Notes:

-The standard JMS spring designed specifically for a 1/4" OD sensor is made of high nickel proprietary spring wire which allows users to successfully maintain 1/2" of spring-loading even up to 1000°F.

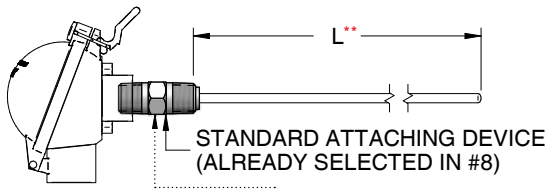
-Spring-loaded extension assemblies should not be used with ceramic protection tubes.





Note: High nickel proprietary spring material is rated to 1000°F. (For 1/4" Ø sensors)

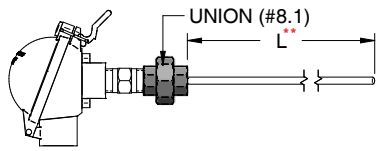
#8	COLD SIDE STANDARD INDUSTRIAL ATTACHING DEVICE [1-3, 6-13]
X	Other, specify
Welded design	
G	Single Thread (Process)
W	Double Threaded
Compression design	
H2	SS w/ SS ferrule
I2	SS w/ Teflon ferrule
J2	SS w/ Lava ferrule
K2	SS w/ Nylon ferrule
L2	Brass w/ Brass ferrule
Spring-loaded design	
D	Single threaded
C	Double threaded w/ oil seal
A	Double w/ threaded retainer
N	Nipple (spring-loaded against terminal block)
S	Double threaded ← MOST COMMON
B	Double threaded Bayonet
BS	Double threaded Bayonet w/ oil seal
BD	Single threaded Bayonet
BDS	Single threaded Bayonet w/ oil seal



** L is the overall length of the sensor to the fixed attaching device. Page 1-1, selection #7 for T/Cs or 3-1, selection #6 for RTDs.

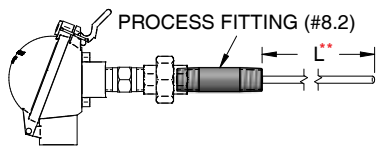
#8.1	UNION
U	Union
O	Coupling
X	Other, specify

Note: Thread adapters may be used when symbol #9 is not 1/2" NPT.

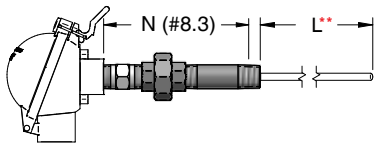


#8.2	PROCESS FITTING (MALE)
N	Nipple
X	Other, specify
Z	N/A (female thread)

Note: Thread adapters may be used when symbol #9 is not 1/2" NPT.



#8.3	N LENGTH
__" Z	Specify (Inches)*
	N/A (female thread)



* ONLY for configurations with nipples (option N for selection #8 or #8.2) ALL other configurations have fixed lengths and this selection is not applicable.

#8.4	UNION and/or NIPPLE MATERIAL		
H	304 stainless steel	X	Other, specify
K	316 stainless steel		
C	Black steel		
G	Galvanized steel		

#8.5	UNION PRESSURE RATING	
1	#150 - A351 spec (Standard)	ASTM
2	#3000 - A182 spec	
3	#6000 - A182 spec	
X	Other, specify	

S	U	N	6"	H	1

Continue on to the "PROCESS NPT" selection to finish creating your sensor part number. Selection #9 on page 1-2 (thermocouples) and 3-2 (RTDs).

BEADED THERMOCOUPLES

Beaded thermocouples are most common in furnace, heat treating and other high temperature applications. Noble Metal Thermocouples (Types R, S, B) and Refractory Thermocouples (Types C & A) incorporate an alumina bead to avoid contamination of the wire. Base Metal Thermocouples (Types J, K, N, E, T and L) are constructed with mullite beads or alumina where the upgrade is more readily available. Smaller AWG thermocouples (20 AWG, 24, AWG, 26 AWG and 30 AWG) are usually built with a single piece insulator. Larger AWG base metal thermocouples (8 AWG, 14 AWG, 20 AWG) are constructed with 1" to 3" long mullite beads that are either oval or rounded. **Heads and attaching devices will be shipped unassembled to the thermocouple unless assembled to a protection tube to avoid breakage in shipment. Must have attaching device and process connection to ship assembled to heads and protection tubes.** See Section 5 for typical protection tube designs. Special designs available by drawing.

#1	DESCRIPTION
1H	Beaded Thermocouple

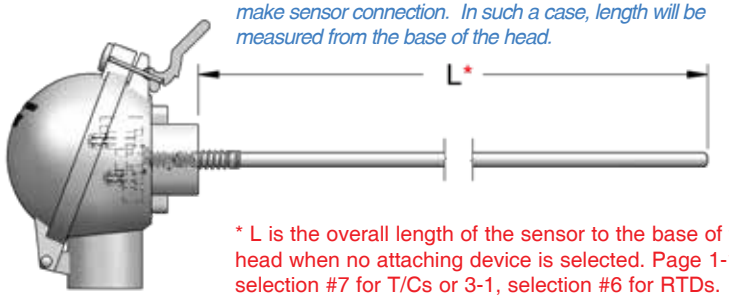
SI	Cast Iron, NEMA 3, 4, UL, CSA (6I)
GA	Aluminum, screw cover w/ indicating window, NEMA 4X, ATEX, IECEx, FM, CSA, IP68 (688A1)
GS	316SS, screw cover w/ indicating window, NEMA 4X, ATEX, IECEx, FM, CSA, IP68 (688S1)

General Purpose

L	Aluminum w/ hinged cover (6L)
M	Aluminum w/ screw cover & chain (6M)
R	Aluminum w/ hinged high dome cover (6R)
N	Cast Iron w/ screw cover (6N)
Q	Black plastic (6Q)
SS	316 stainless steel w/ screw cover & chain (6SS)
WP	White plastic, screw cover, Sanitary (6WP)
SB	Nickel plated, cylinder style, 1/4" NPT (6S250)
SD	Nickel plated, cylinder style, 1/8" NPT (6S125)
SC	Stainless steel, socket cap style
ST	Molded plastic, mini head, 1/4" NPT, < 350F (6T)
SU	Molded plastic, mini head, 1/4" NPT, < 800F (6U)

Some applications may have pre-existing threaded pipes or protection tubes where no attaching device is needed to make sensor connection. In such a case, length will be measured from the base of the head.



* L is the overall length of the sensor to the base of the head when no attaching device is selected. Page 1-1, selection #7 for T/Cs or 3-1, selection #6 for RTDs.

Transmitters [8-1 to 8-3]

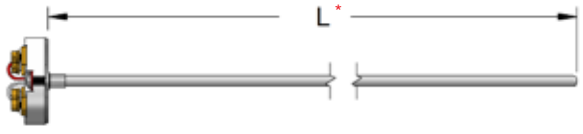
Notes:
- Add span range after transmitter selection. Example: 8H(0-200C).
- Transmitter output = 4 - 20 mA. (See section 8 for other options).

8H	Isolated transmitter
8N	Non-isolated transmitter
8I	Hart Protocol
8E	Intrinsically safe
8D	Hart/Intrinsically safe
8M	Integral transmitter (see page 3-5) RTDs ONLY

8PA	Explosion proof, IP66/IP68, NEMA 4X, ATEX/IECEx, FM/CSA, Aluminum, threaded cap with glass viewing window, touch programmable [8-2]
8PS	Explosion proof, IP66/IP68, NEMA 4X, ATEX/IECEx, FM/CSA, 316 SS, threaded cap with glass viewing window, touch programmable [8-2]

Other

A	Bare ends
K	Spade lugs (6SL)
RL	Ring lugs (6RL)
O	Open ceramic terminal block, brass screw terminal (6B)
OA	Open Bakelite terminal block, nickel plated screw terminal (6BB)
OB	Open ceramic terminal block for sensors with bayonet style connection, brass screw terminal (6B or 6C)
OG	Ceramic terminal block, brass screw terminal (6G)
OP	Pluggable polymide terminal block, nickel plated screw terminal (6PT)
OS	Open ceramic terminal block, nickel plated solder terminal (6C)
CG	Cord connector/grip, aluminum ½" NPT (6CC)
TB	Conduit bushing, ¾" NPT male X ½" NPT female, plated steel (6IRB)
TJ	Junction Box Connector, ½" NPT Zinc (6JBC)
X	Other, specify

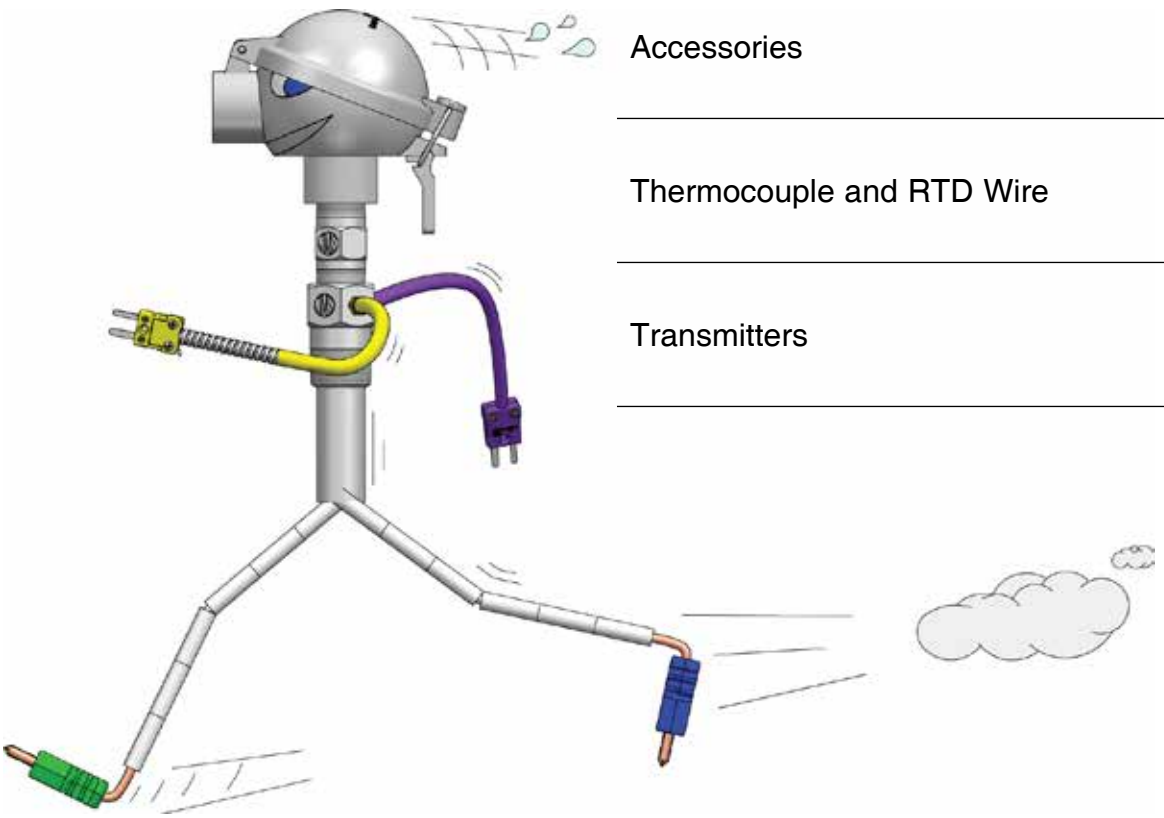


* L is the overall length of the sensor to the base of the terminal block mounting plate when open terminal block cold end termination is selected without a fixed attaching device. Page 1-1, selection #7 for T/Cs or 3-1, selection #6 for RTDs.

PLASTICS SENSORS

NEW WEBSITE & ONLINE CONFIGURATOR!
VISIT WWW.JMS-SE.COM

Swifty Sensor



Due to space limitations we have excluded some part number selections from publication. Additional selections are available via JMS catalog cut sheets posted at www.JMS-SE.com. It is the final reference for JMS part numbers. Custom products are also available with drawings to suit your application. Call 1-800-873-1835 or email Sensors@JMS-SE.com for more information.

BAYONET TEMPERATURE SENSORS

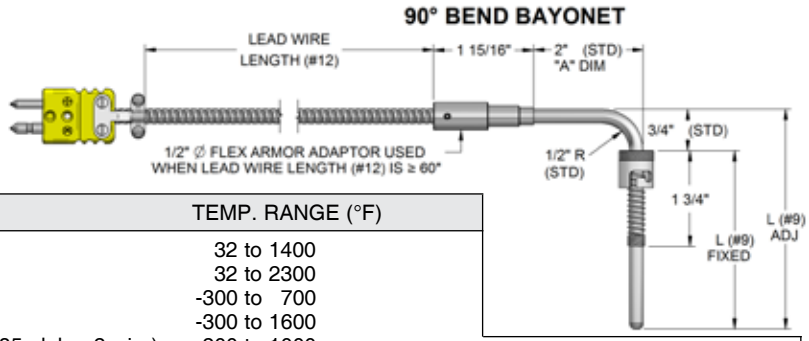
Bayonet style thermocouples are the most common in plastics processing. JMS has adapted this useful and safe design to other industrial sensors to utilize the best features of both.

Our standard design and most commonly used is the Adjustable Bayonet attachment device developed by JMS in 1982. This design incorporates a plated brass cap with a stainless steel spring. The spring fits around the appropriately sized sensor and remains in position until such a time as the user adjusts it. This enables the same sensor to be used for many different applications in the same facility. It also makes for lower inventory levels which your accountant will love.

The other attachment devices we make for your sensors are standard in the industry. For those "Old Dogs" who refuse to try something innovative, we still offer the fixed bayonet design. The length of this sensor cannot be changed and will only go in the hole it was specifically built to fit.

#1	DESCRIPTION
2	Plastics sensors

#2	DESIGN [2-8]
M	MgO insulated (swaged sheath)
H	Hollow tube



#3	TYPE	TEMP. RANGE (°F)
J	Iron/Constantan	32 to 1400
K	Chromel/Alumel	32 to 2300
T	Copper/Constantan	-300 to 700
E	Chromel/Constantan	-300 to 1600
2	100Ω Platinum RTD (0.00385 alpha, 2 wire)	-200 to 1000
3	100Ω Platinum RTD (0.00385 alpha, 3 wire)	-200 to 1000
4	100Ω Platinum RTD (0.00385 alpha, 4 wire)	-200 to 1000
X	Other, specify	

Note: Hollow tube sensors should never be used to measure temperatures above 900°F.

#4	OUTSIDE DIAMETER
C	3/16" (.188")
D	1/8" (.125") **Note:** 1/8" required for nozzle melt style
B	1/4" (.250")
R	6mm (.236")
X	Other, specify
Z	N/A (non-immersion nozzle)

Note: 316 SS standard sheath and tube material.

#5	LIMITS OF ERROR	ELEMENT CONSTRUCTION
1	Standard	Single
2	Standard	Dual
3	Special	Single
4	Special	Dual
X	Other, specify	

Special limits RTDs are JMS Class A tolerance (page 3-1)

#6	CONSTRUCTION
S	Straight
4	45° bend
9	90° bend
X	Specify angle of bend and "A" dimension (see illustrations above)

Note: 1/2" radius bends are standard. Other radii may be specified but they may deform the diameter of the tube at the bend. Larger radii may be required for larger diameters or coated sensors.

#7	MAX TEMPERATURE AT WHICH TIP WILL BE EXPOSED
A	<0°C (32°F) = Kapton*
B	<200°C (392°F) = Teflon*
C	<288°C (550°F) = Kapton*
D	<482°C (900°F) = Fiberglass*
E	<705°C (1300°F)
F	>705°C (1300°F)

*If no transition (Z) is in symbol 13, we recommend these corresponding selections for primary wire insulation on hollow tube sensors.

#8	MEASURING JUNCTION [9]
G	Grounded
U	Ungrounded common (RTDs are always ungrounded)
I	Isolated
E	Exposed
X	Other, specify

#9	LENGTH (L)
__"	Length in inches

Note: See appropriate drawing on page 2-1 & 2-2 before you specify the immersion length. Use 0" for non-immersion nozzle design.

Note: When LENGTH (Option #9) exceeds 90", the probe may be coiled for shipment.

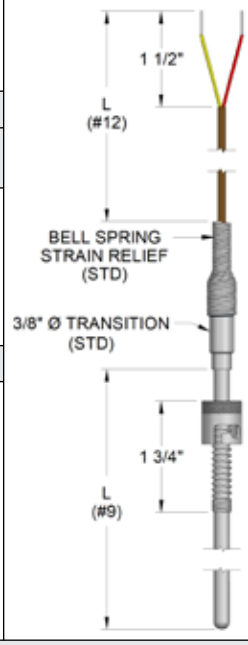
[ ] Brackets indicate page numbers where additional helpful information can be found in technical catalog. Now available online at www.JMS-SE.com/TechnicalCatalog

2	M	K	C	1	9	D	G	3"

#10	ATTACHING DEVICES (see illustrations below) (See page 1-1, #8 for additional options.)
J*	Adjustable bayonet (Standard)
F	Fixed bayonet
P*	Brass compression fitting (1/8" NPT)
N	Non-Immersion nozzle fixed (1/4-28 x 3/8" long thread)
R	Non-immersion nozzle rotating (1/4-28 x 3/8" long thread)
M*	Nozzle melt rotating (3/8-24 x 15/16" long thread)
X	Other, specify
Z	N/A

*Non-fixed fittings do not affect the immersion length(#9).

ADJUSTABLE BAYONET
(Top of cap is usually positioned 3/4" from transition at factory)



#11	ADAPTER TYPE *1/8" NPT & 3/8-24 UNF adapters are used with .125" Ø and .188" Ø sensors.		
1/8" NPT	3/8-24 UNF	NICKEL PLATED STEEL SLOT HEAD MOUNTING ADAPTER (FOR BAYONET ONLY)	
Z	Z	No adapter required	
A	E	7/8" overall length	
B	F	1 1/2" overall length	
C	G	2 1/2" overall length	
D	J	3 1/2" overall length	
X	X	Other, specify	
		K	1/4" NPT X 1 1/4" overall length for 1/4" & 6mm bayonet sensors

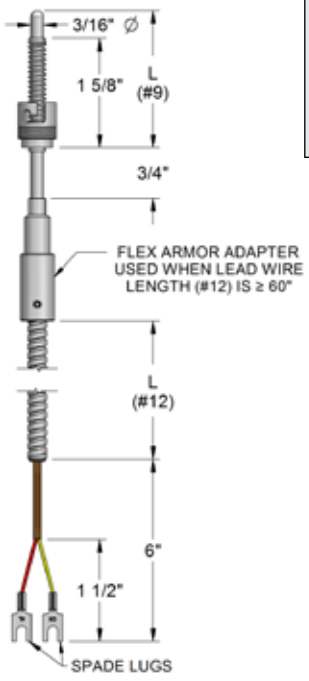
Note: More adapter options on page 2-5.

#12	LEAD WIRE TYPE & LENGTH IN INCHES
Z	No lead wires
1 __"	Fiberglass braid
3 __"	FEP Teflon
5 __"	Kapton
6 __"	Fiberglass braid/flex armor overall
7 __"	Teflon/flex armor overall
8 __"	Fiberglass braid/stainless steel overbraid
S9__"	Teflon ultra-premium, Type T only, 22 AWG, stranded
X __"	Other, specify

Note: 20 AWG solid wire is standard for thermocouples and 24 AWG stranded wire is standard for RTDs.

Note: 24 AWG wire or smaller may be used if necessary.

FIXED BAYONET



#13	TYPE OF TRANSITION [1-16]
H	Heat shrink
S	Size on size
T	3/8" OD or larger (Standard)
R	1/4" OD
X	Other,specify
Z	No transition
Q	Cuttable design (No crimp at end of tube)

Note: For high humidity/moisture environments (≤500˚ F), put a 2 after your selection.

Note: For high temperature at the transition area (>500˚ F), put a 3 after your selection. (May not comply with ASTM Insulation Resistance (IR) test)

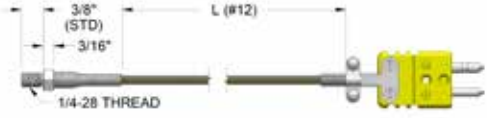
Note: When Z (no transition) is specified for a hollow tube sensor, the extension lead is crimped to the tube.

#14	COLD END TERMINATION [Add'l options see Pg 1-7] CHOOSE AS MANY AS APPLICABLE		
Connectors		Heads	
B	Miniature plug (6A1B2)	I	Explosion proof aluminum, NEMA 4X, FM, CSA, IP68 (6IA)
C	Standard plug (6A1C2)	L	Aluminum w/ hinged cover (6L)
F	High temperature plug (< 800˚ F)	M	Aluminum w/ screw cover & chain(6M)
WM	Microphone style plug (6DA)	N	Cast iron w/ screw cover (6N)
V	Hermetic connector plug (6DC)	Q	Black plastic (6Q)
D	Miniature jack	R	Aluminum high dome, hinged cover (6R)
E	Standard jack	WP	White plastic head, NEMA 4 (WP)
G	High temperature jack (< 800˚ F)	Other	
WF	Microphone style jack (6DA)	A	Bare ends
		K	Spade lugs (6SL)
		O	Open terminal block (6B4)
		X	Other, specify

#15	TAGGING AND CALIBRATION OPTIONS (USE ONLY IF APPLICABLE)
———	See page 1-2, #14 for ordering selections.

NOZZLE MELT

Example part number: 2MKD1SDG12"MZ6(60")TC



NON-IMMERSION NOZZLE

Example part number: 2HKZ1SDU0"NZ1(60")ZC

J	A	6 (72")	T	C	1

PLASTIC MELT EXTRUSION SENSORS

#1	DESCRIPTION
2P	Plastic melt sensors

#2	STYLE [2-6]
4*	Bolt with 1 1/2" bendable metal extension and plug
5	Bolt with direct mount plug
6**	Bolt with 24" of Kapton insulated wire w/flexible armor and plug
X	Other, specify

*Tubular extension between bolt and plug can be formed by hand at application site to desired angle. If longer metal extension from hex to plug connection is required, use X and specify length desired. (Example: 2PXJ13BGP; X=4-6")

**If a length other than 24" of flex armor is required, use X and specify length desired. (Example: 2PXJ13BCP; X=6-36")

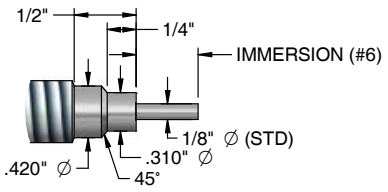
#3	SENSOR TYPE [1-1, 3-1] (Hollow tube design)
J	Iron/Constantan
A	100Ω Platinum RTD 0.00385 alpha (3 wire) (Standard)
X	Other, specify

#4	LIMITS OF ERROR/ELEMENT CONSTRUCTION		
1	Standard/Single	4	Special/Dual
2	Standard/Dual	X	Other, specify
3	Special/Single		

Special limits RTDs are JMS Class A tolerance (See page 3-1)

#5	BOLT LENGTH [2-6]				
3	3"	6	6"	X	Other Specify"

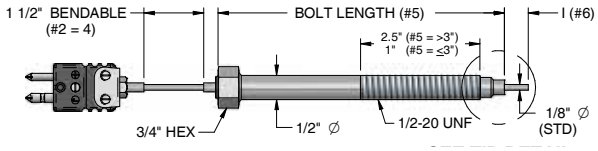
TIP DETAIL



#6	IMMERSION (I) [2-6]		
A	Flush	C	1"
B	1/2"	X	Other, specify

#7	MEASURING JUNCTION [2-9]
G	Grounded
U	Ungrounded common (RTDs are always ungrounded)
E	Exposed
I	Isolated
X	Other, specify

For special wetted parts facing, use X + description. (Example: X=Grounded + Hastelloy C-276 facing)



#8	MAXIMUM SERVICE TEMPERATURE
P	<500°F (Standard)
Q	500°F - 900°F

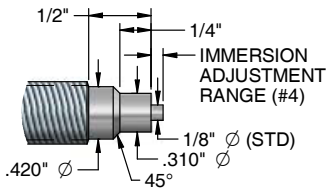
#9	TAGGING/CALIBRATION OPTIONS
____	See page 1-2 #14 for ordering selections.

PLASTIC MELT EXTRUSION ADJUSTABLE SENSORS

#1	DESCRIPTION	#2	SENSOR TYPE [3-1] (Hollow Tube Design)
27	Adjustable plastic melt sensor	J	Iron/Constantan
		3	100 Ω Platinum RTD, 0.00385 alpha (3 wire) Class B
		X	Other, specify

#3	BOLT LENGTH	#4	IMMERSION ADJUSTMENT RANGE [9]
3	3" Bolt	A	1/8" - 1"
5	5" Bolt	B	1/8" - 2 1/2"
7	7" Bolt	X	Other, specify
X	Other, specify		

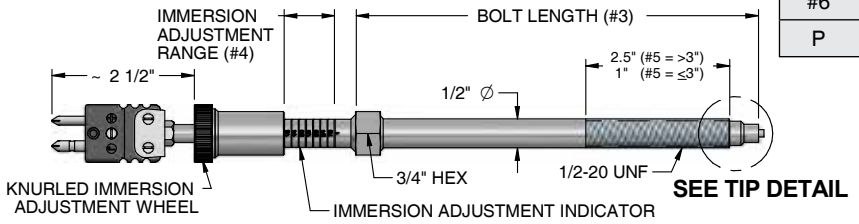
TIP DETAIL



#5	MEASURING JUNCTION		
G	Grounded (Standard)	I	Isolated
U	Ungrounded (RTDs always ungrounded)	X	Other, specify
E	Exposed (Recommended for profiling)		

#6	MAX SERVICE TEMPERATURE		
P	<500°F (Standard)	Q	500°F - 900°F

#7	TAGGING/CALIBRATION OPTIONS
____	See page 1-2 #14 for ordering selections



FLEX ARMOR ADJUSTABLE DEPTH SENSORS

#1	DESCRIPTION
2K	Flexible armor adjustable depth sensor

#2	SENSOR TYPE
J	Iron/Constantan (Standard)
K	Chromel/Alumel
T	Copper/Constantan
E	Chromel/Constantan
3	100Ω Platinum RTD 0.00385 alpha (3 wire) Class B
4	100Ω Platinum RTD 0.00385 alpha (4 wire) Class A
4S	100Ω Platinum RTD 0.00385 alpha (4 wire) 1/10th DIN
X	Other, specify

Note: Add a 2 for dual element. (Example: 2J)

#3	FLEX ARMOR DIMENSIONS
1	.125" ID X .210" OD
2	.188" ID X .270" OD (Standard)

#4	TUBE LENGTH
__"	Length in inches
Z	Flush - no tube (Standard)

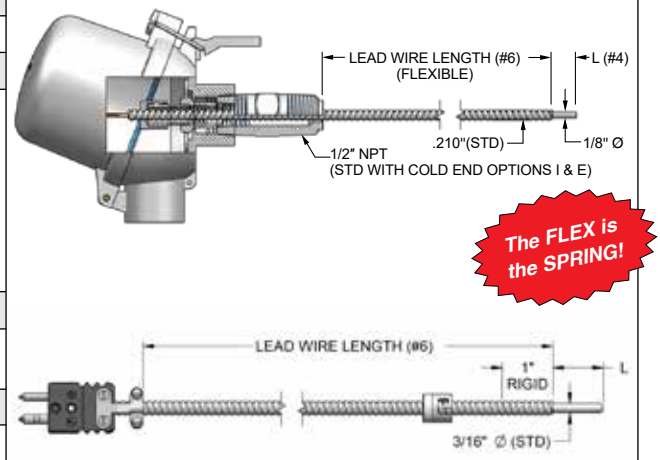
#5	JUNCTION
G	Grounded (Standard)
U	Ungrounded - (RTDs are always ungrounded)

#6	LEAD WIRE LENGTH (Standard Insulation Fiberglass)
__"	Length in inches

#7	COLD END TERMINATION [Additional options see Pg 1-7]
C	Standard plug
E	Standard jack
K	Spade lugs
I*	Explosion proof head, 1/2" x 3/4" NPT connection with fitting
R*	High dome, general purpose head w/ hinged cover, 1/2" x 1/2" NPT fitting
T	Junction box connector
A	Bare ends (Standard)
P**	Single 1/2" NPT thread with bayonet S/L
X	Other, specify

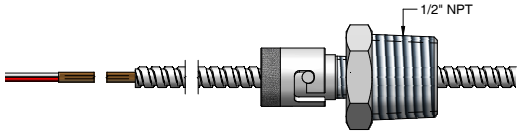
If bayonet adapter is needed for mounting, see page 2-5.

#8	TAGGING AND CALIBRATION OPTIONS (Use only if applicable)
____	See page 1-2 #14 for ordering selections.



* Symbols I & R are not usually used in plastics manufacturing. These options are designed to provide a spring-loaded industrial sensor that can be used through elbows and around corners. Also an excellent solution when spring-loading is needed for a protection tube or thermowell that has become warped or bent. Select symbol #3-1 for .210 OD flex armor to fit thermowells.

** Match with additional code end options.
If none are specified, will be supplied with bare ends.



COLD END OPTION P (Use with .125" Flex Armor Dimension)

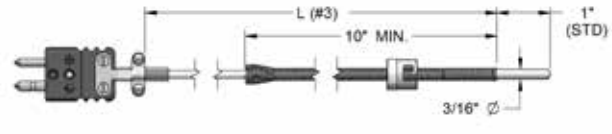
SPRING ADJUSTABLE DEPTH SENSORS

#1	DESCRIPTION
2Q	Spring adjustable depth bayonet sensor with SSOB fiberglass leadwire

#2	SENSOR TYPE		
J	Iron/Constantan (Standard)	E	Chromel/Constantan
K	Chromel/Alumel	3	100Ω Platinum RTD 0.00385 alpha (3 wire) Class B
T	Copper/Constantan	X	Other, specify

#3	LEAD WIRE LENGTH
48"	Length in inches
60"	Length in inches
L__"	Length in inches

Note: Length measured from front of spring to back of cable clamp.



#4	JUNCTION
G	Grounded (Standard)
U	Ungrounded common (RTDs are always ungrounded)

#5	COLD END TERMINATION [Additional options see Pg 1-7]		
A	Bare ends (Standard)	K	Spade lugs (compensated)
C	Standard plug	T	Junction box connector
E	Standard jack	X	Other, specify

Note: If pipe clamp or bayonet adapter is required, see page 2-5.

#6	TAGGING AND CALIBRATION OPTIONS (use only if applicable)
____	See page 1-2 #14 for ordering selections.

MGO VS HOLLOW TUBE

Bayonet thermocouples can be constructed with Magnesium Oxide sheath material or hollow tube units made with lead wires inserted in tubing. Magnesium Oxide (MgO) insulation is a dry, uncontaminated, compacted ceramic powder. MgO gives the thermocouple high insulation resistance and dielectric strength. Also, it allows excellent insulation of the positive and negative wire conductors in relation to each other and to the outer sheath. Among the outstanding features of sheath material are: (A) flexibility to bend or form to twice the radius of the sheath diameter, (B) its rigidity to maintain size and shape after bending or straightening, (C) vibration or shock has no effect on the material, (D) sheath material withstands pressures upward to 50,000 psi, and (E) sheath material may be used in applications where temperatures may range from -400° to 3000°F depending on requirements and selection of materials.

INSULATOR	PURITY %	MELTING POINT °C	MELTING POINT °F	USABLE TEMP. °C	USABLE TEMP. °F
Magnesium Oxide(MgO)	96.4% (STD) 99.4% (must specify) 99.8% (must specify)	2790	5050	1650	3000

New insulation materials are being developed. Use an X and describe to specify.

The hollow-tube design is used for disposable thermocouples that can be replaced easily. Their life is about half of that of a Magnesium Oxide insulated thermocouple. The advantage of a hollow-tube design is the cost. It is the least expensive design for the short run.

BAYONET ACCESSORIES

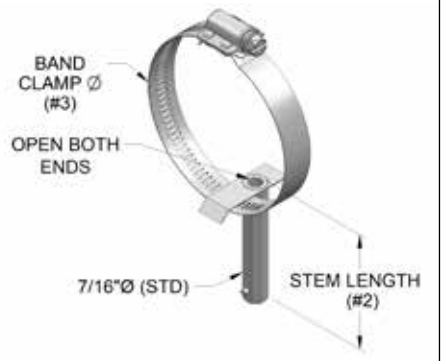
STAINLESS STEEL PIPE CLAMP ADAPTERS

#1	DESCRIPTION
2C	Pipe clamp bayonet adapter (For .125" Ø and .188" Ø sensors)

#2	L (STEM LENGTH IN INCHES)
R	1-3/4"
S	3-3/4"
T	8-3/4"
X	Other, specify
Z	N/A, hose clamp only

#3	STANDARD PIPE SIZE (INCHES)	BAND CLAMP MIN. (INCHES)	DIAMETER MAX. (INCHES)
1	1/4 to 3/8	7/16	25/32
2	1/2 to 3/4	11/16	1-1/4
3	1 to 1-1/2	1-1/16	2
4	2 to 2-1/2	2-1/16	3
5	3 to 3-1/2	3-5/16	4-1/4
6	4	3-9/16	4-1/2
7	5	5-1/8	6
8	6	6-1/8	7
X	Other Specify		

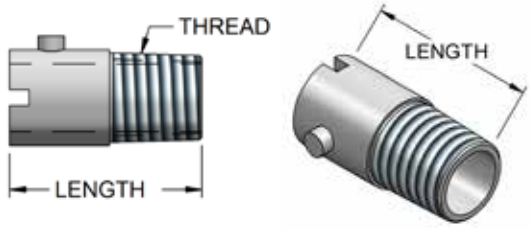
2C	S	3



Note: L = Length of stem. Should be equal to the maximum insulation thickness + 3/4". The bayonet sensor length for adjustable should be L + 1-1/4". For fixed, it should be L + 1/2".

NICKEL PLATED SLOT HEAD ADAPTERS

THREAD			LENGTH
1/8" NPT	3/8"-24	1/4"NPT	
2A	2E	6BA78	7/8" overall length
2A1	—	6BA	1-1/4" overall length
2B	2F	—	1-1/2" overall length
2C	2G	—	2-1/2" overall length
2D	2J	—	3-1/2" overall length



Note: To order adapters of different lengths, use 2A + X for 1/8" NPT and 2E + X for 3/8"-24 threads. You must specify length. Standard slot head adapters are nickel plated brass. Other materials are available upon request.

RESISTANCE TEMPERATURE DEVICES (RTDS)

RESISTANCE TEMPERATURE DEVICES (RTDS)

#1	DESCRIPTION
3	RTD

#2 ELEMENT TYPE [3-4, 9, 10, 11, 15, 18, 22, 24] — 100 Ω Platinum 0.00385 alpha (Ω/Ω/°C) unless otherwise stated

	Resistor Accuracy at 0°C	Thermometer Class [pg. 3-18]	Resistor Class [pg. 3-18]
B	± 0.30°C (Competitor's Std)	B	≥ F 0.3
E	± 0.15°C (Standard)	A	≥ F 0.15
P*	± 0.06°C	AA	≥ 1/2 F 0.1
S*	± 0.03°C (Best Accuracy)	1/4 A	≥ 1/10 W 0.3
N	± 0.74°C (120 Ω Nickel α=0.00672)	Non-Standard	Non-Standard
M	± 0.30°C (1000 Ω)	B	≥ F 0.3
X	Other, specify [3-22]	--	--

Note: Wound or film resistors may be used.

* For compliant results, use 4 wire RTD for high accuracy (types P & S).

#3 ELEMENT CONSTRUCTION [4]

S	Single	Standard construction
D	Dual	Standard construction
J	Single	Swaged construction
K	Dual	Swaged construction
X	Other, specify	
SV	Single	High vibration construction
DV	Dual	High vibration construction

Note: Use swaged for high temperature, bendability, and/or longer than 90".

#4 TUBE DIAMETER MUST CHOOSE 1

P	1/2" (.500")	D	1/8" (.125")
A	3/8" (.375")	X	Other, specify
Y	5/16" (.313")	Z	N/A
B	1/4" (.250")		
R	6mm (.236")		
C	3/16" (.188")		

TIP CONSTRUCTION [1-13] MUST CHOOSE 1

N	Normal, closed tip (Standard)
K	Pointed tip, 45°
M	Weld pad
O	Weld pad, removable
R2	Gas/Air, exposed
W*	Enlarged tip
Y2	Reduced tip
X	Other specify

* Provide length and enlarged diameter description when selecting this option.

#5 TUBE MATERIAL [3-11, 3-13]

K	316 stainless steel	C	Teflon coated, stainless steel	X	Other, specify
L	316L stainless steel	S	Titanium		
M	I-600 (Use if symbol #7 >500°F)	Q	Hastelloy C-276		

#6 LENGTH (L) (See illustrations on pages 3–1 and 3–2 for "L" dimension)

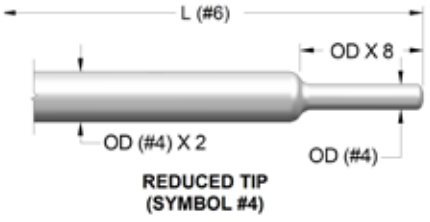
__" Immersion length in inches (lengths greater than 90" may be coiled for shipment)

#7 MAX TEMPERATURE AT WHICH TIP WILL BE EXPOSED

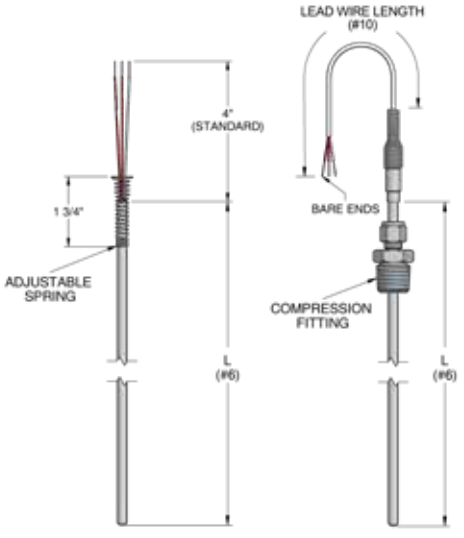
A	<0°C (32°F) Cryogenic = 5 Kapton
B	<200°C (392°F) = 3 Teflon*
C	<288°C (550°F) = 5 Kapton*
D	<350°C (662°F) = 1 Fiberglass*
E	<660°C (1220°F) = 4 High temperature fiberglass*

*If no transition (Z) is in symbol 13, we recommend these corresponding selections for primary wire insulation on hollow tube sensors.

[ ] Brackets indicate page numbers where additional helpful information can be found in our technical catalog. Now available online at www.JMS-SE.com/TechnicalCatalog



REDUCED TIP (SYMBOL #4)



Note: L is the overall length of the sensor to the transition, wire, plug, head, or fixed attaching device. L excludes non-fixed attaching devices.

NEW ***Skip to page 1-3 to complete selection #8 if your sensor requires a nipple and/or union extension.***

#8 STANDARD INDUSTRIAL ATTACHING DEVICE [1-3, 6-13]

X	Other, specify	
Z	N/A	No attaching device
G	Single thread (process)	Welded design
F	Single thread (reversed)	
W	Double threaded	
H*	SS w/ SS ferrule	Compression design
I*	SS w/ Teflon ferrule	
J*	SS w/ Lava ferrule	
K*	SS w/ Nylon ferrule	
L*	Brass w/ Brass ferrule	
D	Single threaded (process)	Spring-loaded design
C	Double threaded w/ oil seal	
A	Double w/ threaded retainer	
E	Adjustable spring	
S	Double threaded (most common)	
B	Double threaded bayonet	
BS	Double threaded bayonet w/ oil seal	
BD	Single threaded bayonet	
BDS	Single threaded bayonet w/ oil seal	

* For double threaded use a 2 suffix along with your selection. Example: H2

Note: High nickel proprietary spring material is rated to 1000°F (for 1/4" Ø sensors)

OR → S { U | N | 6" | H | 1 }

SEE PAGE 1-3

3	E	S	BN	K	12"	B	S

RESISTANCE TEMPERATURE DEVICES (RTDS)

#9 PROCESS CONNECTION SIZE & TYPE [3]

L	1/8" NPT	O	3/4" NPT
M	1/4" NPT	X	Other, specify
A	3/8" NPT	Z	N/A
P	1/2" NPT (Standard)		

Note: Threaded bushing may be used for sizes larger than 1/2"

#10 LEAD WIRE TYPE & LENGTH IN INCHES [see section 7]

1__"	Fiberglass braid	X__"	Other, specify
3__"	Teflon (Standard)	Z	N/A
4__"	High temperature fiberglass braid		
5__"	Kapton (Standard for Cryogenic)		

Note: All wire in tubes > 1/8" OD will be 24 AWG. Smaller tubes will have a max. of 28 AWG. If no transition or armor is specified, wire may be fragile. JMS standard lead wire for RTDs is stranded plated copper.

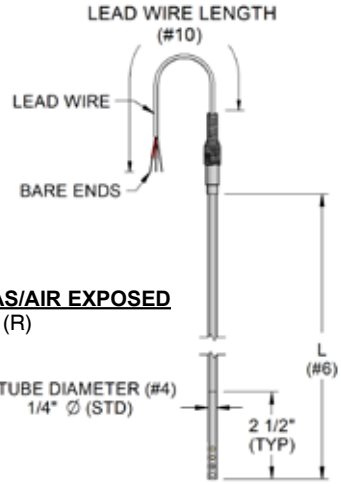
#11 ARMOR OR HEAT SHRINK/JACKET [7-7]

A	SS flex armor (Standard)	G	Heat shrink/sleeving
B	SS flex armor Teflon coated white	H	Jacket to match primary insulation
C	SS flex armor Teflon coated black	J	Aluminum Mylar shielded and jacketed to match primary insulation
D	1/8" ID SS flex armor	Z	N/A
F	SS overbraid	X	Other, specify

#12 WIRE CONFIGURATION [17, 18]

T	2 Wire
Y	3 Wire
W	4 Wire

Note: Use a double symbol for 2 separate multiconductor lead wires, if dual elements. For example, TT.



GAS/AIR EXPOSED
#4 (R)

Note: Immersion shown (#6) is overall length of tube for gas air sensors.

#13 TYPE OF TRANSITION [14]

H	Heat shrink
S	Size on size
T	3/8" OD or larger
R	1/4" OD
Q	Cuttable (Std construction only) [3-12]
X	Other, specify
Z	No transition

Note: For high humidity/moisture environments (≤ 500˚F), put a 2 after your selection. For example, R2.

Note: For high temperatures at the transition area (500°F to 1200°F), put a 3 after your selection. For example, T3.

#14 COLD END TERMINATION [Additional options see Pg 1-7] Choose all that apply

Connectors

B	Miniature plug
C	Standard plug
F	High temp plug (< 800°F)
WM	Microphone style plug
D	Miniature jack
E	Standard jack
G	High temp jack (< 800°F)

AVERAGING RTDS

Continuous averaging resistance temperature detectors are most frequently used in air washing and air handling systems where turbulent and stratified air flow may affect the temperature measurement in a tip sensitive probe. The average temperature of the air in the duct can be measured with this type of sensor.

Any application which requires an averaging of temperature across an area would be suited for this sensor type. The operating temperature range for a continuous averaging RTD is from -148 to 382°F. Lower temperatures and temperatures up to 900°F are handled with a multipoint design (4, 8, or 16 points).

#1	DESCRIPTION
3A	Averaging RTD

#2	ELEMENT TYPE 0.00385, 100Ω @ 0°C, Class B **Note:** For 1000 Ω RTD put a K after your selection. For example, P4K.		
E*	Continuous, -148° to 382°F (-100° to 194°C)	X	Other, specify
P4**	Platinum 4 point, <900°F (<482°C)		
P8**	Platinum 8 point, <900°F (<482°C)		
P16**	Platinum 16 point, <900°F (<482°C)		

* Only available in 1/4" diameter up to 1200" long.
** Maximum probe length is 240"

#3	PROBE DIAMETER		
B	1/4" (.250")	C	3/16" (.188")

#4	SENSING LENGTH
__"	Sensing length in inches **Note:** Sensing length must be at least 4" shorter than the total probe length.

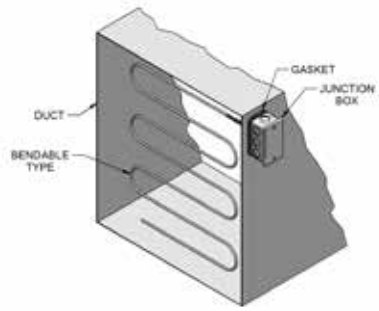
LOW COST AVERAGING RTDS

Low cost averaging RTDs sense the temperature of air streams in ducts and plenums. This sensor includes a junction box with gasket to prevent leakage and vibration noise.

These thermometers have a continuous element to sense true average temperature along their entire length. They provide accurate composite readings in locations where air may be stratified into hot and cold layers.

Rigid averaging sensors have a brass case. Bendable models have aluminum sheaths (Copper on special order) formable to a radius of 4". Bendable sensors can criss-cross ducts to average temperatures in two dimensions.



Specifications:
Temperature range: -45.5 to 135°C (-50 to 275°F); Gasket: 100°C (212°F); Leadwire: 22AWG, Teflon insulated, 8" long; Sheath diameter: .188" OD.

RTD WITH INTEGRAL PC PROGRAMMABLE TRANSMITTER

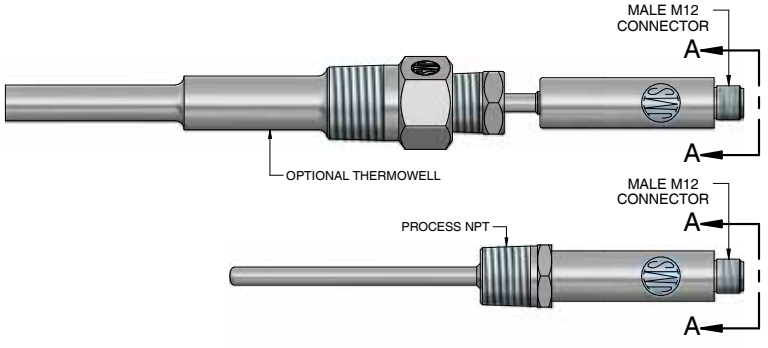
RTD with 4-20 mA INTEGRAL OUTPUT (RTD *in*, 4-20 mA *out*)

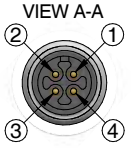
INDUSTRIAL STYLE INTEGRAL TRANSMITTER (Transmitter option see page 3-2, #14, 8M)

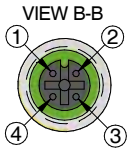
FEATURES:

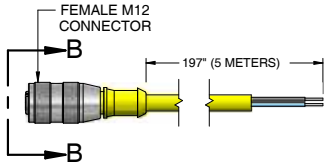
- PC programmable
- Carry a 4-20 mA to your PLC directly from the RTD with no special equipment.
- Available in fixed immersion and spring loaded for thermowells!!
- Quick-n-Clean M12 connection for easy replacement.
- NEMA 6P (IP67) rated with M12 connector.
- Ideal for most applications from -60 to 320°F.
- Ambient temperature limits -40 to 185°F.

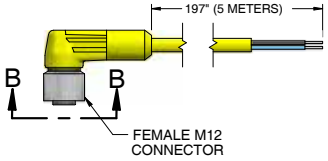
Ideal for high moisture environments!

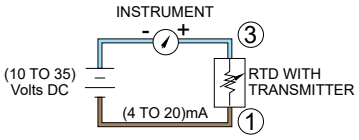












4 WIRE RTD WITH TRANSMITTER

CIP SANITARY RTDS & THERMOCOUPLES

JMS's Clean-in-Place (CIP) Sanitary RTDs and Thermocouples are manufactured to 3-A Standard 74-07 and are specially designed to meet the needs of the food, dairy, beverage, pharmaceutical, chemical, and cosmetic industries. They are ideally suited for a number of applications where corrosion and contamination are factors. They are fabricated from stainless steel or other 3-A accepted material using a method assuring imperfection-free surfaces. All sanitary grade thermocouples are provided to special limits of error. All sanitary RTDs are available in 4 wire construction.

Standard Number 74-07

Direct Immersion sanitary sensors incorporate sanitary caps manufactured per the ASME BPE standard. Removeable sensors for sanitary applications typically incorprate spring loaded fittings and are assembled with sanitary thermowells. Wetted materials are polished to a #4 finish to assure that there are no pits, folds or crevices. The exterior nipple, also stainless steel, can be joined to a connection head, designed to withstand caustic washdown. A typical RTD or Thermocouple (see pages 1-1 and 3-1) may be used with a sanitary thermowell (see pages 4-3 through 4-6).

SANITARY WELD-IN THERMOWELLS

JMS Southeast, Inc. is proud to be a certified US manufacturer of a full line of sanitary RTDs, Thermocouples, and Thermowells (3-A Standard 74-07).

JMS Southeast's sanitary weld-in thermowell designs are manufactured to exacting 3-A Standard 74-07 requirements, enabling you to maintain a clean in place manufacturing process incorporating easy to calibrate, removable and replaceable temperature sensors. Sanitary weld-in thermowells should be welded to a tank or a vat with a full penetration crevice-free fillet weld to avoid cracks and crevices. Standard sanitary weld-in wells are fabricated from stainless steel and then polished to a #4 finish or better depending on the customer specification. If desired, wake frequency calculations per ASME/ANSI PTC 19.3TW can be performed on these products using JMS's free SwiftyCalc software.

Standard Number 74-07

In addition to sanitary weld-in thermowells, JMS also offers a full line of Sanitary Cap Thermowells that also meet 3-A Standard 74-07.

#1	DESCRIPTION

Ultra High Accuracy Type T Wire Thermocouple

Moisture, rough handling and severe conditions all pose grave threats to the functionality of Type T thermocouple measurements - measurements which are a critical component of many high accuracy laboratory and pharmaceutical applications.

JMS presents its rugged, fast response, multi-strand Type T sensor. These sensors are manufactured from premium Type T 22 AWG thermocouple wire, which is accurate to ± 0.22˚C at 121˚C, and with hermetically sealed tips perfect for environments with high humidity. These sensors represent the cutting edge in thermocouple technology.

To order, simply specify JMS part # followed by options shown at left.

Example: 4VA120"W36L for an Ultra High Accuracy Type T thermocouple sensor 120 inches in length, clear jacket, weep holes, and label.

SANITARY ELBOW THERMOWELL

Welded directly into the process line as an elbow, sanitary elbow thermowells offer unbeatable immersion depths with reduced stress on the probe stem to ensure accurate and reliable temperature measurements in all types of pharmaceutical and food grade applications. For line sizes ranging from 1" to 6", this integral thermowell design provides the convenient ability to remove and replace the sensor for calibration or maintenance without having to open up the process line, or turning your thermowell into a plug in the line. FNPT and Sanitary Cap connections available as best meets your requirements. Elbows comply with ASME BPE DT-4-1, MJ-8.5-1, SF-2.2-1, SF-2.2-2 (when electropolished), and SF-2.6-1.

HAND HELD SENSORS

#1	DESCRIPTION
4H	Hand held sensor

#2	TYPE
J	Iron/Constantan, standard limits of error
K	Chromel/Alumel, standard limits of error
T	Copper/Constantan, standard limits of error
E	Chromel/Constantan, standard limits of error
3	RTD 100Ω Platinum .00385 alpha, 3 wire, Class B
X	Other, specify

#3	OUTSIDE DIAMETER (OD)
A	3/8" (.375")
B	1/4" (.250")
C	3/16" (.188")
D	1/8" (.125")
E	1/16" (.063")
X	Other, specify

#4	LENGTH (L)
__"	Immersion length in inches

Note: Standard material is 316 stainless steel.

#5	MEASURING JUNCTION
G	Grounded
U	Ungrounded (RTDs are always ungrounded)
J*	Pointed tip, grounded
K*	Pointed tip, ungrounded
X*	Other, specify

Note: See ordering symbols on page 1-1, row 6 for special junctions such as pointed tip and gas/air.

*Provide dimensions when selecting these options.

#6	HANDLE STYLE (See illustrations below and to the left)
H	Handle for replaceable probe
R	Rectangular permanent handle for non-replaceable probe
S	Rugged, stainless steel handle for non-replaceable probe
C	Contoured permanent handle for non-replaceable probe
X	Other, specify
Z	N/A

#7	LEAD WIRE INSULATION AND LENGTH IN INCHES
S	Coil-cord. Length will stretch from 12" to 36" (Standard)
2__"	20 AWG PVC
3__"	20 AWG Teflon
5__"	20 AWG Kapton
6__"	20 AWG fiberglass braid/flexible armor overall
7__"	20 AWG Teflon/flexible armor overall
8__"	20 AWG fiberglass braid/stainless steel overbraid
9__"	3 conductor Teflon with overall jacket of Teflon (RTD only)
10__"	3 conductor Teflon/stainless steel overbraid w/ overall jacket of Teflon. (RTD only)
Z	N/A
X	Other, specify

#8	COLD END TERMINATION [Additional options see Pg 1-7]
A	Bare ends
B	Miniature plug (Standard)
C	Standard plug
D	Replacement sensor
X	Other, specify

Other styles of hand-held sensors are available. See page 4-13 or contact JMS Southeast, Inc. for your custom design.

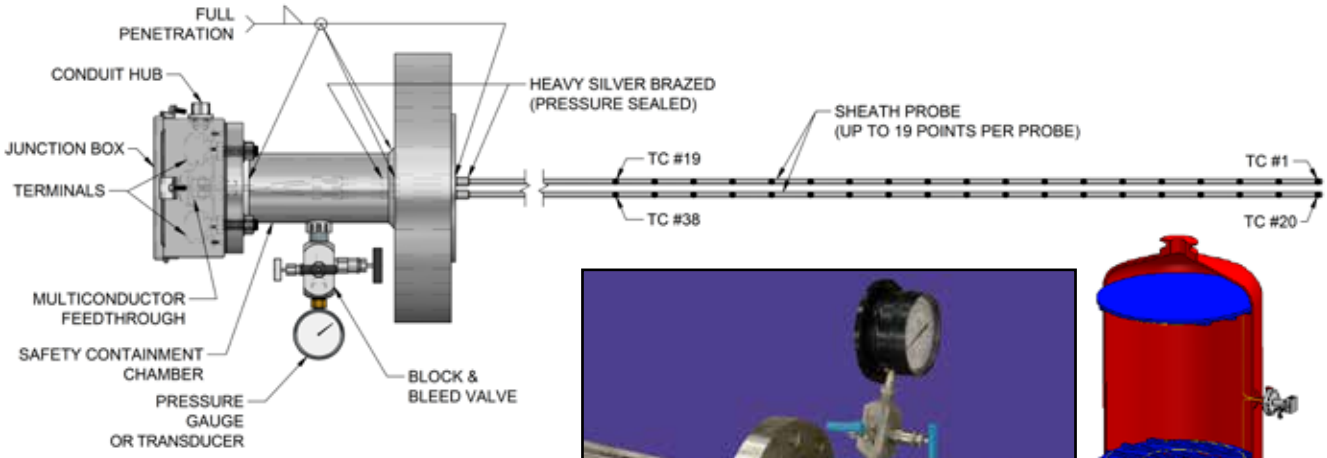
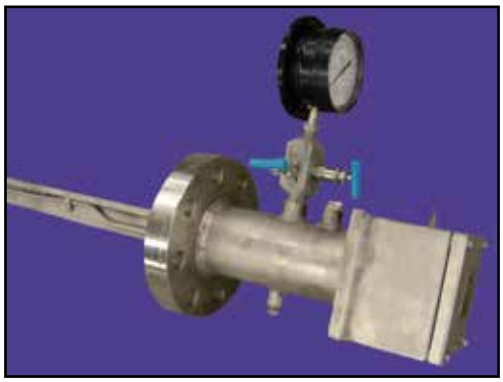
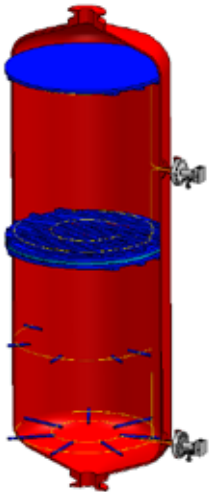
CENTERPOINT







MI CABLE DESIGN AND CONSTRUCTION

DESIGN

- *CenterPoint MI cables are 0.070" thick, double-wall design with a 5/16" sheath O.D.*
- *First wall is 0.035" overlapping second wall of 0.035"*
- *Second wall acts as a flexible protective thermowell wrapped around a flexible, heavy-walled thermocouple*
- *Single CenterPoint MI cable can house 19 points of temperature indication, greatest in the industry*
- *CenterPoint sheath materials are available in any metallurgy*
- *Thermocouples are available in any calibration*
- *A single CenterPoint assembly can be designed for complete coverage of a single catalyst bed*

Each CenterPoint assembly is custom designed to meet the specification of the Process Licensor, Engineering Company and End User

CONSTRUCTION

- *Double wall construction allows the MI cable to be welded to the flange face without damage to the cable caused by localized heat buildup during the welding procedure*
- *Drawing and Annealing sheath material provides a flexible housing for the thermocouples*
- *Restricting process flow (should the sheath integrity become breached) is tightly packed Magnesium Oxide insulation*
- *No special tools necessary for making long bends*
- *Tubing benders required for tight radius bends*

COLD END DESIGN

- *Pressure gauge directly tied to flange penetration creating secondary safety system*
- *Eliminates the need for additional welded or flanged safety chamber*
- *Reduced flange face penetrations maintains flange integrity*
- *Double block and bleed valve designed to bleed off trapped hydrogen or process fluids*
- *Each junction is equipped with a 10,000 psi pressure fitting,*
- *All welds are full penetration welds*
- *Bare wire feedthrough seal ensures no tunnel through safety containment chamber*

CenterPoint provides optional secondary containment chambers available to meet the design needs and specifications of the customer

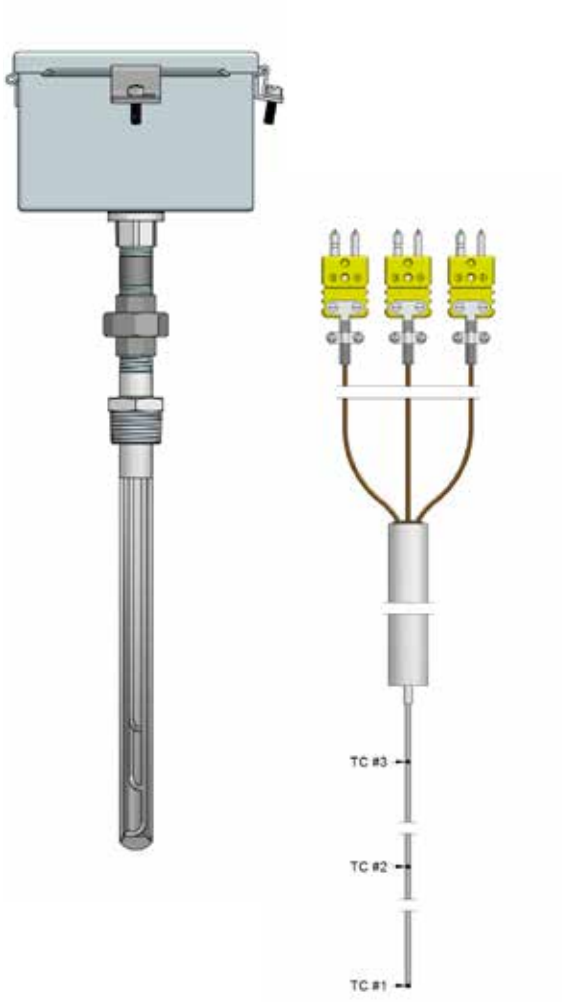
SAFETY BENEFITS

- *Rapid speed of response time: Real time temperature measurements*
- *96% of a 100 degree step change in 3 to 8 seconds*
- *Eliminate temperature excursions on high temperature, high pressure*
- *Radial spread determines "hotspot" locations near reactor walls*
- *Reduce/replace many reactor skin thermocouples*
- *Can be tied into the EMS system*

MULTIPOINT

PERMANENT & REPLACEABLE MULTIPOINT SENSOR DESIGNS AVAILABLE

Note: For flexible high temperature reactor design, see next two pages.

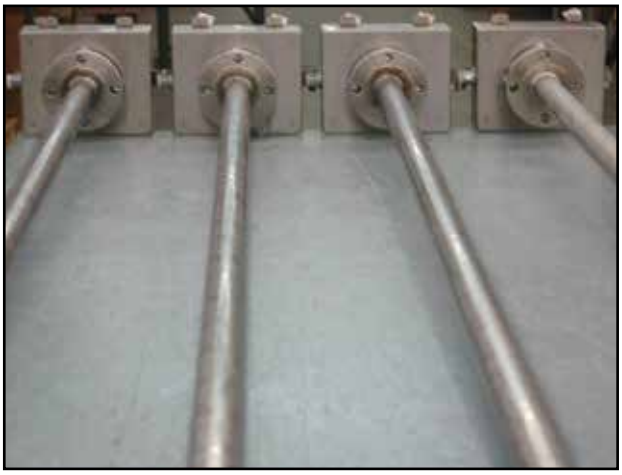


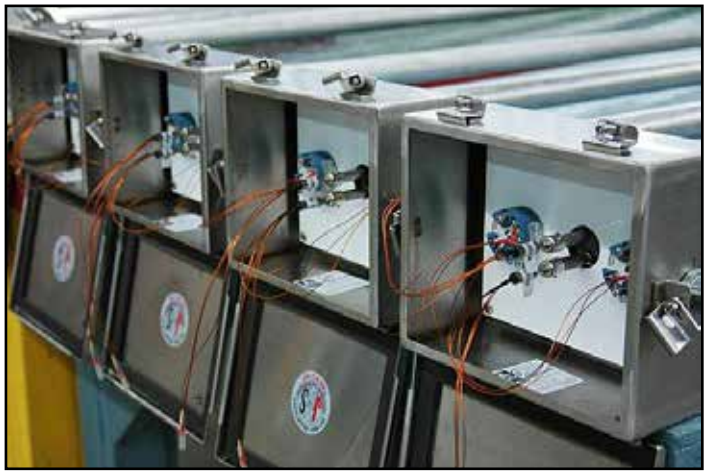
A multipoint sensor allows the measurement of a temperature profile across a large area. Thermocouples or RTDs are arranged with measuring junctions at various points along a pipe, allowing the measurement of various points from a complete assembly. Many elements can be spaced along a probe.

This opens up possibilities for improved profiling in reactors, for example, where flow interference prevents inserting large numbers of individual probes. Multipoint probes can also be used to give a temperature profile where stratification of a tanks contents may be of concern. JMS will custom design your assembly to give you the most accurate temperature measurement for your process.

The following information and/or drawing is needed to properly design your assembly:

- Thermocouple calibration or RTD element type
- Outside diameter of pipe and pipe material
- Junction style of thermocouple
- Sensor material (bare wire, 316 SS tubing, or sheath material)
- Overall length of the entire assembly
- Process connection
- Accuracy required
- Cold-end termination
- Maximum operating temperature



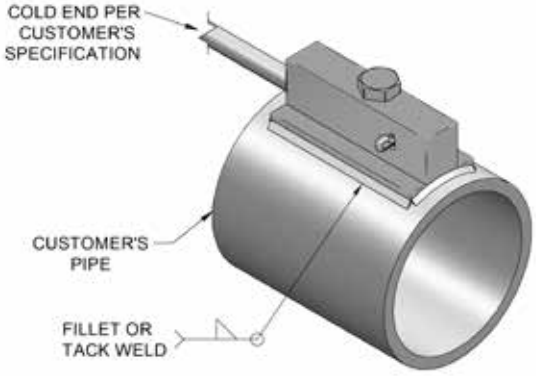


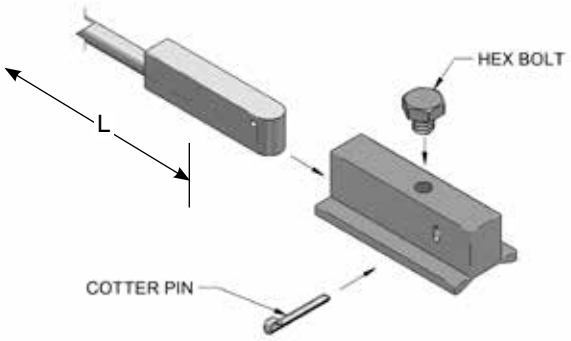
Averaging or discrete point measurement available upon request.

JMS will generate a drawing for your assembly.

FASTTRAX

(Also referred to as the Removable Weld Pad design)





Note: To order this style as a thermocouple, see page 1-1, selection #6, options N and O in the JMS Ordering Catalog. For an RTD, see page 3-1, selection #4, option O.

APPLICATIONS

- *Single or dual fired furnace tubes*
- *Top, side, or bottom fired furnace tubes*
- *Boiler tubes in power plants*
- *Catalyst tubes/tube sheath reactors (example: steam methane reformers, polygas units, acrylic acid units)*
- *Steam tracing lines*
- *Coker units*
- *External skin temperature for hydroprocessing units (example: hydrocracking, hydrotreating reactor)*

INSTALLATION

- Installation or supervision available
- *Supervision recommended*
- *Never burn up a thermocouple on install again*
- *E&I Tech can replace Fasttrax probe using only a ladder and a pair of pliers*

LOW-COST REPLACEMENT

- *Install hardware ONE TIME*
- *No need to scaffold furnace*
- *No grinding off existing TSTC*
- *No grinding down to base metal for welding (causes additional tube thinning)*
- *No welders necessary*
- *No moving Tubeskin TC out of the initial zone you want to measure because you cannot weld near last Tubeskin TC*
- *Re-order ONLY the replaceable probe*

DESIGN

- *Anti-slip cotter pin design*
- *Low profile heat shield*
- *Heavy-walled sheath*
- *Available in wrap-around design & parallel designs*
- *Available with S-Loops or expansion coils*

HIGH RELIABILITY

- *Fully protected probe*
- *S-Loops keep thermocouple sheath hidden and out of flame*
- *Clips placed on tube help hold thermocouple in place while process acts as a heat sink*
- *Wire contact WON'T slip from contact point due to JMS cotter pin design*
- *Safety*
- *Measure tube temperature, not process temperature*
- *Recognize tube wear and tube thinning*
- *Error set to high side of tube temperature-added safety*
- *Small offset allows you to push process furnace without sacrificing safety*
- *Highly accurate for safety*
- *Ceramic-filled heat shields may lead to low tube skin reading and compromise safety*
- *Large metal heat shields can absorb large amounts of radiant heat*

HIGH ACCURACY

- *High accuracy bare wire contact with tube surface*
- *Bare wire is the standard by which all tube skin thermocouples are tested for accuracy*
- *Low heat transfer from heat shield/lowest profile heat shield in the industry*
- *Reduces effects of radiant heat on thermocouple*

PIPE STAND SKIN SENSORS

#1	SUPPORT STRUCTURE
4W	Weld pad support structure

#2	SENSOR TYPE				
	THERMOCOUPLE			*RTD (class A, Pt100)*	
E	Type E	N	Type N	2	2-wire
J	Type J	T	Type T	3	3-wire
K	Type K			4	4-wire
X	Other, specify				

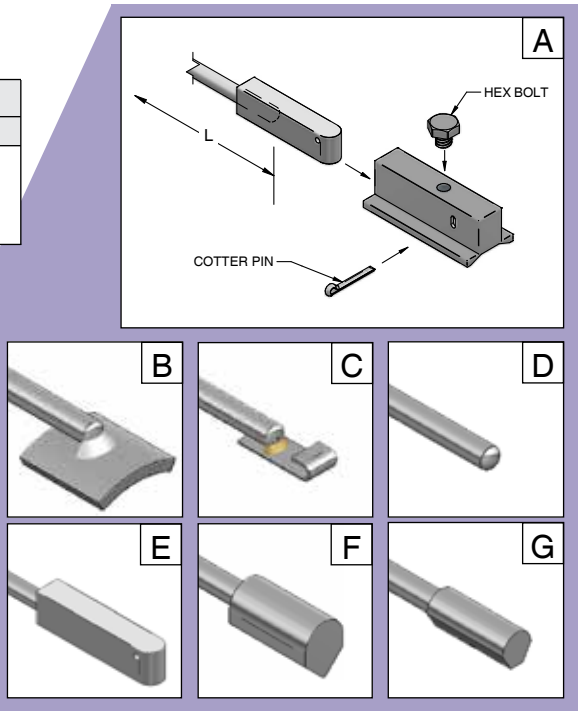
Note: Add 2 prefix for dual element. (example: 2K)

#3	PROBE DIAMETER		
B	1/4" Ø (0.250")	D	1/8" Ø (0.125")
C	3/16" Ø (0.188")	X	Other, specify

#4	PAD / SHEATH MATERIAL		
K	316 SS	M	Inconel 600
H	304 SS	X	Other, specify pad & sheath*
J	310 SS		

* Carbon steel pads usually welded to 316 SS sheath. F grade pads (ex: F11, F91) to I600 sheath.

#5	TIP / WELD PAD DESIGN
A	JMS Fastrax weld pad assembly, replaceable
B	Weld pad, standard 1" x 1"
C	Clamp hook pad (High temp Inconel 600 not available)
D	Standard round tip
E	Fastrax replacement "foot" only
F	UniVersal weld pad
G	Contoured weld pad (Contour matches #8 pipe diameter)
X	Other, specify



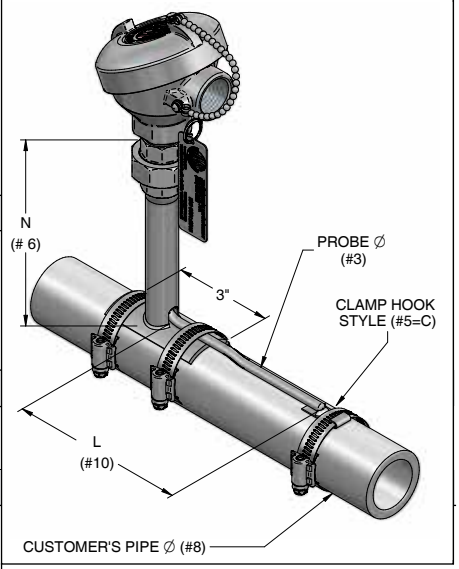
#6	N LENGTH	*SEE ILLUSTRATION*
__"	Specify (in inches)	3 1/2" minimum

Note: Standard mounting base pad material is 316LSS. Add "1" prefix for matching mounting base pad material.

#7	JUNCTION STYLE	GROUNDED	UNGROUNDED	ISOLATED
G	Grounded			
U	Ungrounded (RTDs always ungrounded)			
I	Isolated			

#8	CUSTOMER PIPE DIAMETER				
	Standard Pipe size	Actual Ø		Standard Pipe size	Actual Ø
075	3/4" (MIN)	1.05"	50	5"	5.56"
10	1"	1.32"	60	6"	6.63"
15	1 1/2"	1.90"	80	8"	8.63"
20	2"	2.38"	100	10"	10.75"
25	2 1/2"	2.88"	120*	12"	12.75"
30	3"	3.50"			
40	4"	4.50"			
X*	Other, specify	___"			

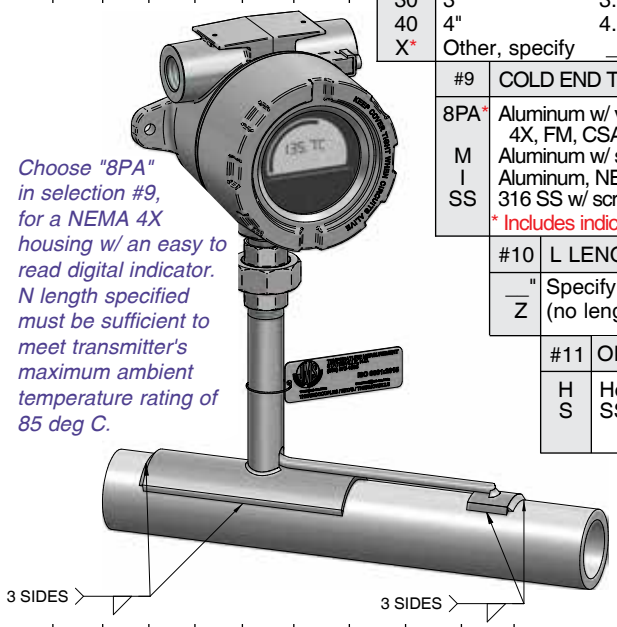
*Weld pads are not curved to fit customer's pipe for diameters 12" and larger due to the minimal tangency gap.



#9	COLD END TERMINATION [Additional options see Pg 1-7]		
8PA*	Aluminum w/ viewing port, NEMA 4X, FM, CSA, ATEX, IECEx	A	Bare ends
M	Aluminum w/ screw cover & chain	X	Other, specify
I	Aluminum, NEMA 4X, FM, CSA, IP68		
SS	316 SS w/ screw cover & chain		

* Includes indicating transmitter. See 8-2 for details

Choose "8PA" in selection #9, for a NEMA 4X housing w/ an easy to read digital indicator. N length specified must be sufficient to meet transmitter's maximum ambient temperature rating of 85 deg C.



#10	L LENGTH	SEE ILLUSTRATION
__"	Specify (in inches)	4" minimum
Z	(no length) Spring loaded to pipe inside nipple	

#11	OPTIONS		
H	Hose clamps(QTY 3)	M	MTR (Welded parts)
S	SS tag	X	Other, specify

4W	E	B	K	A	4"	G	075	8PA	4"	H

Note: Sensor weld pad styles A & D (#5) along with nipple stand weld pads will be curved to fit customer's pipe diameter (#8).

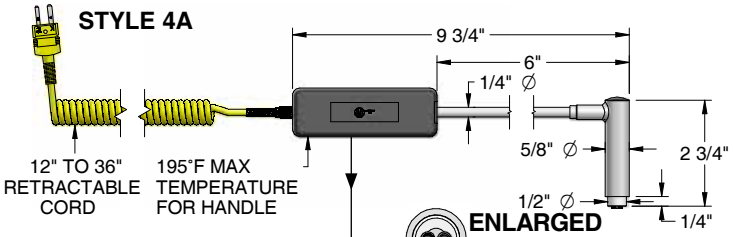
SURFACE SENSORS

The JMS Brush Thermocouple can be used in applications in which a surface temperature of a stationary or moving electrically conducting surface is needed.

True temperature measurement of a surface is very hard to obtain. Previous designs called for the probe to fully contact with as small a junction as possible, spring load with as even pressure as possible, insulate around the surface to be measured, or combinations of all these methods.

All of the above methods have proven to have their own particular faults. When compared to an infrared sensor, which does accurately measure surface temperature (unit must have correct emissivity adjustment), most of the above mentioned sensors either read much hotter or colder than the infrared. However, even the infrared style exhibits problems when emissivity levels fall beneath 0.4 or less (most metallic surfaces). JMS has applied for a patent on this brush sensor because of its unique design and widespread application. The JMS brush probe eliminates emissivity, surface contact and heat wicking considerations.

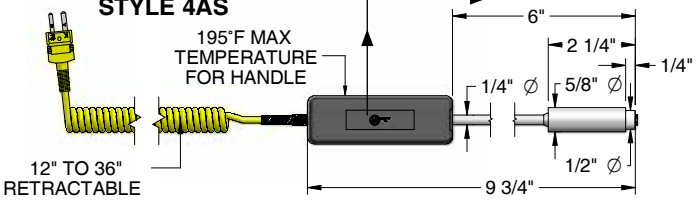
STYLE 4A



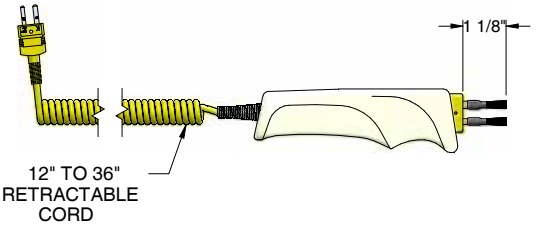
ENLARGED END VIEW

For optional contoured handle, add C after 4A / 4AS

STYLE 4AS



ENLARGED END VIEW



TEMPERATURE RATING IS BASED ON T/C TYPE

#1	STYLE	(See illustrations above & to the right)	
4A*	Hand held (90° design) with square handle -- 4AC for contoured	4BK*	Specialty brush sensor
		4B*	Permanent mount
		4PADT**	Large pad
		4PADL**	Small pad surface
4AS*	Hand held (straight design) with square handle -- 4ASC for contoured	4SA	Surface adhesive

*Not available as RTD
**Not available as Thermocouple

#2	COLD END TERMINATION [Additional options see Pg 1-7]

F__"*	Flat Silicone Ribbon Wire	Z	N/A
S	Coil-cord (Standard)		
3__"	Teflon		
5__"	Kapton w/ SS overbraid		
X	Other, specify		

*Used for 4PADT and 4PADL pad RTDs only

#5	# OF REPLACEMENT TIPS		
0	No sets	Z*	N/A
1 +	Number of sets		

*Standard for styles 4B, 4PADL,4PADT, 4SA

Note: Thermocouple wire is 24 AWG solid conductors. RTD wire is 28 AWG stranded conductors.

The JMS pad RTD is a 100 Ohm platinum RTD with an alpha of 0.00385 Ω/Ω/°C. Pad material is a high temperature silicone material. The pad style RTD has an effective operating range from -80C to 200C and its tolerance is 0.15 F(+/-0.15C at 0°C). Additional silicone leadwire is configured as a 3 or 4 wire RTD. Higher temperature configurations can be designed.

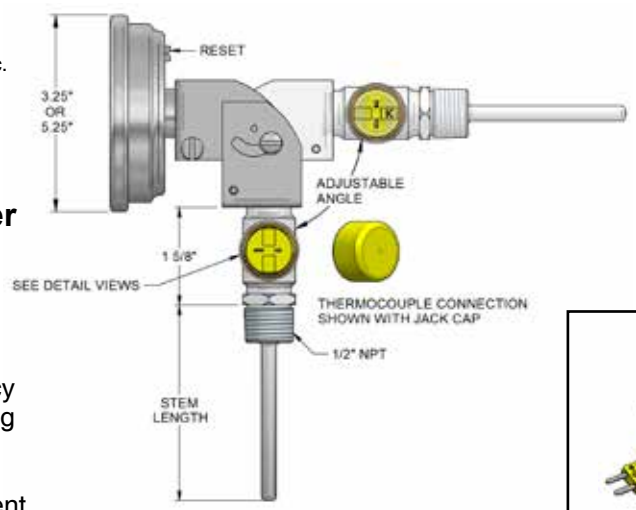
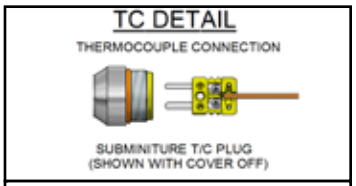
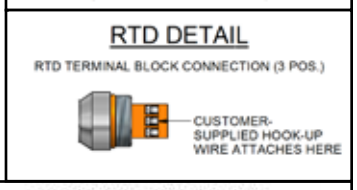
ANALOG BEMOMETER SENSORS

BE•MORE•METER!!
Originally developed by JMS Southeast, Inc.







Unites Bimetal with either Thermocouple or RTD Technology!

- Bimetal Dependability
- Thermocouple / RTD Accuracy
- Direct AND Electronic Reading
- Easy To Use
- Easy To Calibrate
- Two Sensors in One Instrument

This thermometer combines the convenience, simplicity, and self-powered actuation of a bimetal thermometer with the digital accuracy and data acquisition capabilities of a thermocouple or RTD. With standards traceable to the NIST, this new instrument offers simplified calibration for ISO 9000 compliance and other statistical process control requirements. It is also ideal in applications requiring easy and quick readability while still affording a means of electronic data acquisition. There is no need to add additional access points or thermowells to your existing process in order to gain different types or readings.

This is available with a 3" or 5" dial, in a Back Connected or Adjustable angle case, 1/4" stem diameter in lengths to 12", 1/2" NPT connection, in ranges from -100°F (-70°C) to 500°F (260°C), with Fahrenheit, Celsius and Dual Scale Dials available. Thermocouple output may be accessed via a plug-in connector; RTD output is accessed by a terminal block. Both have 1/2" conduit threaded mounting (PWK option) and a plastic cap standard. Optional weatherproof housing is available. Construction is of type 304 series stainless steel with a glass crystal. It is hermetically sealed per ASME B40.3 standard. It also comes with a one-year warranty.

BIMETAL TEMPERATURE GAUGES

JMS, the highest quality thermocouple & RTD manufacturer, now brings you the highest quality bimetal gauge. Great for clear local indication without the need for a power source, the JMS Bimetal Thermometer features an hermetically sealed NEMA 4X 304 SS case and stem with external adjustment capability (upgradeable to 316SS by option for All Angle 5" dials). Manufactured to ASME B40.200 Grade A standards with Accuracy meeting or exceeding ± 1% of full scale, you will not find a better bimetal on the market. Capable of customization to your liking. Just ask or use an "X" in the part # to describe your requirement!!

#1	DESCRIPTION
9B	External Adjustable Bimetal Thermometer

#2	DIAL MOUNT STYLE
A	All angle (std)

				0/350	-20/170	200/1000***	100/550				

* Liquid filled option not available for these temperature ranges.
** All Angle and Right Angle Mounts must be 5" dial size for these temperature ranges
*** Dial size must be 5"

Note: If Dual Scale, state only the larger print inner temperature range (ex: if #6 is "D" and #7 is (0-300F) dial will be 0/300F Inner & -20/150C Outer). Continuous Operation at or above 800F (425C) not recommended. Where Temperature Range maximum value exceeds this temperature then intermittent service to maximum value is possible.

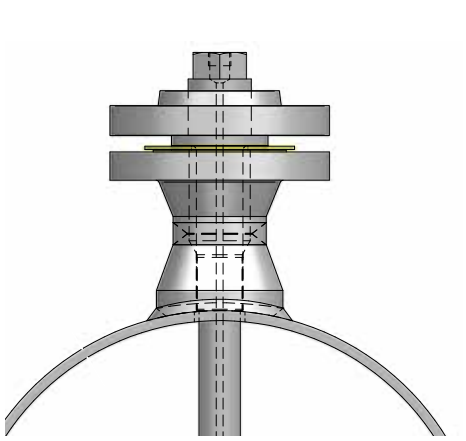
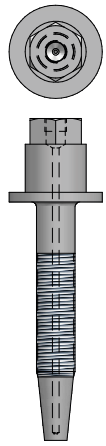
SWIFT WELL (PATENT PENDING)

MEET THE NEW SWIFTWELL CALCKILLER

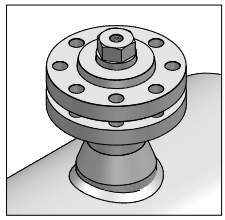
FROM JMS SOUTHEAST, INC.

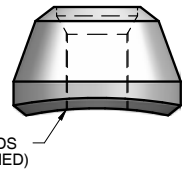
Developed with Bechtel Engineering, this flanged thermowell enables longer, skinnier immersions into a pipe resulting in faster, more accurate temperature measurements. The flange holds pressure just like a normal van stone thermowell with pressure ratings per ASME B16.5. The machined thread fixes the thermowell with an established foundation compliance factor so that calculations can be run per the ASME / ANSI PTC 19.3TW Thermowells code!





Having trouble getting your flanged thermowell to pass muster under the ASME 19.3TW calculation? Call JMS today! Excellent for new installations.



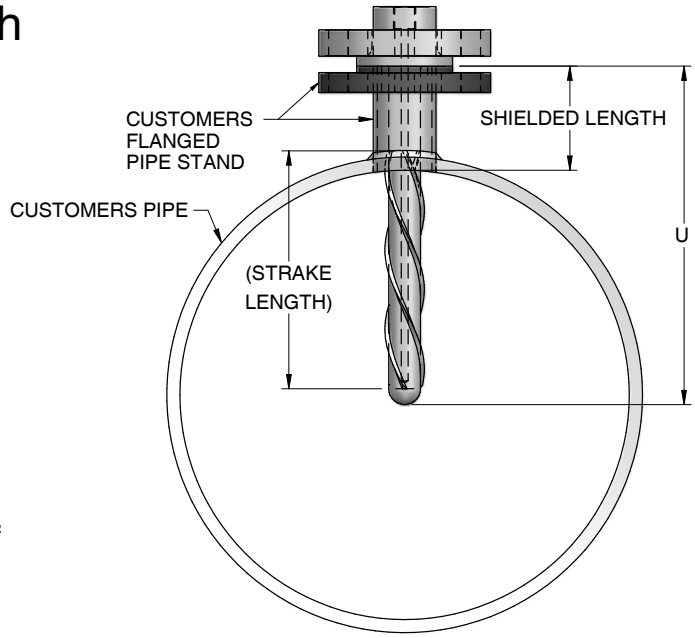


JMS will generate a drawing specific to your requirement.

CAROLINA TWIST

Thermowell Immersion Length Limited by Wake Frequency Calculation Results?

Although outside the scope of ASME 19.3TW, straked thermowells can increase the velocity at which resonance occurs while diminishing wake frequency induced vibration. Best suited for clean, non-erosive, non-corrosive gas applications where the design constraint is a projected failure due to wake frequency.



Carolina Twist designs are typically provided with a rounded tip and do not require any reconfiguration of the thermowell nozzle to install. Steady state stress and pressure calculations can be provided to help guide your design judgment.

JMS will generate a drawing specific to your requirement.

Call JMS today. We can help!

Also Available for Sample Probes!

METAL PROTECTION TUBES

CERAMIC PROTECTION TUBES

Alumina, Mullite and Hexoloy SE protection tubes are used at high temperatures that have a small slope of temperature change. Any thermocouple type can be used in these ceramic tubes; however, Platinum-Rhodium and Chromel-Alumel are used most often due to their high operating temperature range. "Alumina" is an Aluminum Oxide ceramic (99.7% Al2O3). "Mullite" is a compound of Alumina and Silica (Silicon Carbide). "Hexoloy" is a sintered alpha Silicon Carbide. Alumina tubes can be used at 3400°F (1870°C), Mullite tubes can be used at 3100°F (1700°C) and Hexoloy will not slump at 3000°F (1648°C) even under load. Alumina and Mullite tubes are somewhat gas tight, sensitive to thermal shock, and can crack if one end of the tube is heated at a different rate than the other. If the tubes are exposed to a significant sharp decline or rise in temperature, they may crack. Hexoloy has excellent thermal shock resistance, universal corrosion resistance and exceptional wear with high strength and extreme hardness for severe environment applications. It is not gas tight.

Platinum-Rhodium thermocouples should always be protected in ceramic protection tubes. Alumina should be used rather than Mullite for all atmospheres, except oxidizing, where Mullite can be used. The Silicon from the Mullite can contaminate the Platinum-Rhodium thermocouple.

We recommend that the user preheat the entire tube to ≈ 900°F before installing it into a hot process environment.

#1	DESCRIPTION

Note: Do NOT use spring-loaded sensors in ceramic protection tubes.

MCPT - METAL CERAMIC PROTECTION TUBES

The MCPT consists of a hard abrasion-resistant Chromium and Aluminum Oxide material. It has good strength at temperatures where many high-temperature metals melt. This "hybrid" composition is slightly less resistant to thermal and mechanical shock than metal protection tubes, but much greater than that of ceramic protection tubes.

The MCPT exhibits good wear resistance and corrosion resistance. It has a hardness of Rockwell C37, which indicates the crushing strength of the material rather than the true hardness of the entire body. Great solution for sulfur burner and many other sulfuric environments.

JMS Southeast, Inc. offers the special optional fitting pictured below for mounting the metal ceramic protection tube in high temperature sealed environments. The minimum "U" length available is 2.35".

#1	DESCRIPTION	
5G	Metal Ceramic Protection Tube (MCPT) 5/8" ID x 7/8" OD, 3/4" NPT conduit connector	- Add a W here for a Brass cap and stainless steel chain attached to protection tube (Example: 5GW)

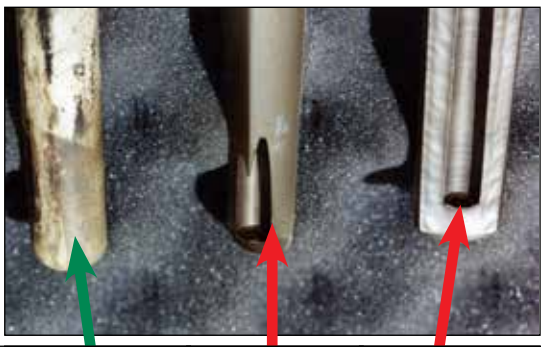
COAL PULVERIZING THERMOWELL

This well is ideal for coal pulverizers, fluidized beds and any place where contact instrumentation might be subjected to Small Particle Erosion (SPE). JMS found that in many SPE applications customers were using OEM supplied hard faced thermowells with a variety of coatings. These thermowells were expensive to replace and could not withstand the harsh erosive environment of pulverized coal. The wear to these OEM supplied wells resulted in loss of reliability, change in response time and significant energy costs.

In response to these concerns, JMS developed a pressure sealed dependable alternative and has had some wells in place for more than 6 years without appreciable wear. A side by side comparison of durability is pictured on the right.



JMS Coal Pulverizing Design	Typical Design w/ Stellite Coating	Typical Design Uncoated Steel

#1	DESCRIPTION	
5V	Coal pulverizing thermowell -	Add a W here for a brass plug and stainless steel chain attached to well (Example: 5VW)

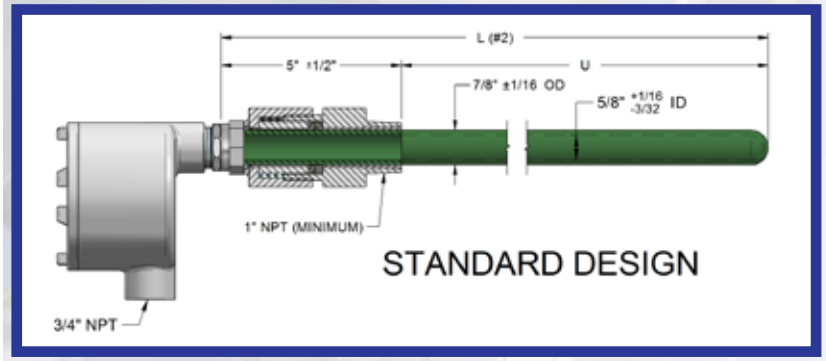
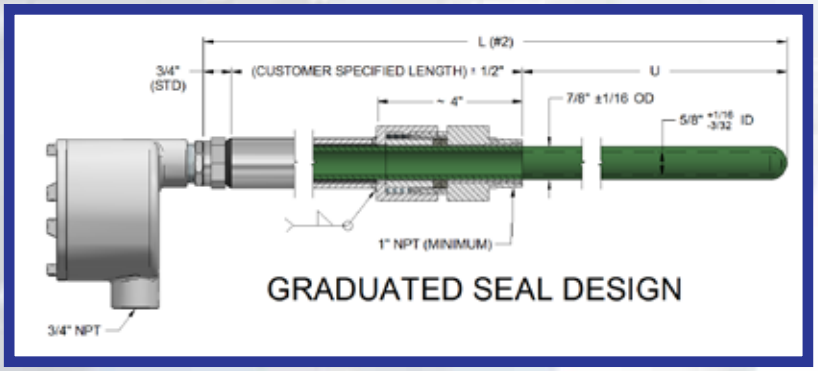
SULFUR PROTECTION TUBE

DESIGN ASPECTS





See page 5-8 (5G) for ordering.

- Excellent corrosion resistance capable of resisting even the punishing temperatures and corrosion of a sulfur burner.
- Dual graduated seals allow the end user to access and monitor the sensor, while preventing leakage of sulfur burner contents.
- Maximized lifespan of wells and sensors.
- Tightly bonded layer of Chromium Oxide which, together with the naturally inert nature of Alumina, provides protection tubing with a remarkable resistance to oxidizing and corrosive atmospheres over 2200°F.
- High thermal conductivity and sensitivity to temperature changes makes it an excellent choice for thermocouples used to monitor or control high temperature environments.
- Great strength at temperatures where many high temperature metals melt. Above 2800°F it begins to soften and becomes plastic.
- Less porous than most compacts. No significant passage of gas through the body at high temperatures, except under high vacuum. Sufficiently impermeable for most industrial applications.
- Superior to "straight ceramics" in resisting thermal and mechanical shock.
- Sturdy UL, FM and CSA approved explosion proof head.
- Not recommended in boiling sulfuric acid -- 10%. For more information regarding its suitability to your application, Call JMS Today!!!

SULFUR PROTECTION TUBE

See page 5-8 (5G) series for ordering.

PROCESS BENEFITS

- **JMS provides experienced engineering capable of designing to suit your specification needs.**
- **Maximized lifespan of wells and sensors.**
- **Increases reliable temperature measurements in Sulfur burners and other sulfuric environment applications on an ongoing basis.**
- **Reduces risk of Sulfuric acid leaking into uncontained areas.**
- **Reduces shut downs due to sensor replacement.**
- **Avoids the high cost of repetitive replacements.**

Published with permission. PCS Phosphate - NC.

APPLICATIONS

Sulfuric acid plants

H_2SO_4

Corrosive SO_2 and SO_3 gas to 2500°F at tip

Corrosive SO_3 and HF gas to 2000°F

Boiling H_2SO_4 – 97%

Many additional applications.

Call JMS today for prompt and friendly assistance with your specification needs.

SAMPLE PROBES

Due to space limitations we have excluded some part number selections from publication. Additional selections are available via JMS catalog cut sheets posted at www.JMS-SE.com. It is the final reference for JMS part numbers. Custom products are also available with drawings to suit your application. Call 1-800-873-1835 or email Sensors@JMS-SE.com for more information.

CONNECTION HEADS

JMS part numbers are shown in black. (Ordering codes are shown in parenthesis) (Max temp ratings shown in red text on the right)

6L (L)
General purpose aluminum head with hinged cover 1/2" x 1/2" connection (Standard)

Features:
*Corrosion resistant *Moisture resistant
*Dust resistant *Durable
*NEMA 4

150°C

6M (M)
General purpose aluminum head with cap and chain, 1/2" x 3/4" connection

Features:
*Corrosion resistant *Moisture resistant
*Dust resistant *Durable
*NEMA 4

150°C

6N (N)
General purpose cast iron head with cap and chain, 1/2" x 3/4" connection

Features:
*Corrosion resistant *Moisture resistant
*Dust resistant *Durable
*NEMA 4

150°C

6SS (SS)
General purpose 316 stainless steel head with cap and chain, 1/2" x 3/4" connection

Features:
*Corrosion resistant *Moisture resistant
*Dust resistant *Durable
*NEMA 4X

150°C

6I (SI)
Explosion proof cast iron head 3/4" x 3/4" connection

Features:
*UL, CSA explosion proof rated for Class I, Div. I, Groups B, C, D, Class II, III Div. I, Groups E, F, G, *NEMA 3 & 4 rated. *Moisture resistant, *Dust resistant. *Cast iron with aluminum cover.

85°C

6ISS (J)
Explosion proof stainless steel head 1/2" x 3/4" connection

Features:
FM, CSA explosion proof rated for Class I, Div. I, Groups B, C, D, Class II, Div. I, Groups E, F, G, Class III. *NEMA 4X rated. IP68.

85°C

6ISSATEX (U)
Explosion proof stainless steel head 1/2" x 3/4". IP68

Features:
ATEX explosion proof rated for II 2G Ex d IIC

85°C

6IAIEC (P)
Explosion proof aluminum head 1/2" x 3/4" connection

Features:
FM, CSA ATEX & IEC Ex explosion proof rated for Class I, Div. I, Groups, B, C, D, Class II, III, Div. I, Groups E, F, G. ATEX II 2GD Ex d IIC Gb Ex tb IIIC Db, IEC Ex SIR 09.0006U, NEMA 4X, IP68.

85°C

6IA (I)
Explosion proof aluminum head 1/2" x 3/4" connection

Features:
FM, CSA. Explosion proof rated for Class I, Div. I, Groups B, C, D. Class II, III, Div. I, Groups E, F, G. NEMA 4X, IP68

85°C

6R (R)
High dome, general purpose head with hinged cover, 1/2" x 1/2" connection

Features:
*Corrosion resistant *Moisture resistant
*Dust resistant *Durable
*NEMA 4

150°C

6WP (WP)
White plastic screw-top head (polypropylene) 1/2" x 3/4" connection

Features:
*Moisture resistant *Dust resistant
*Very light weight *Corrosion resistant
*NEMA 4X

90°C

6Q (Q)
Black plastic (polyamide 6) head 1/2" x 1/2" connection

Features:
*Moisture resistant *Dust resistant
*Corrosion resistance *Very light weight

130°C

6S250 (SB)
Cylinder style head, 1/4" NPT
Small & light weight

100°C

6S125 (SD)
Cylinder style head, 1/8" NPT
Small & light weight

100°C

6T (ST)
Miniature molded head, 1/4" x 1/4" connection

175°C

6U (SU)
Hi temp miniature head, 1/4" x 1/4" connection

425°C

6G2Z (2 Terminals)
6G4Z (4 Terminals)
6G6Z (6 Terminals)
Ceramic block with brass terminals for type 6M and 6N connection heads.

Dimensions:
H=1.50", W=1.95", D=1.50"

(OG)

200°C

688S1 (GS)
Explosion proof head, 316SS 1/2" x 3/4" x 3/4" connection, threaded cap with glass viewing window.

Features:
ATEX/IECEx, FM/CSA, NEMA 4X rated.

85°C

688A1 (GA)
Explosion proof head, coated Aluminum 1/2" x 3/4" x 3/4" connection, threaded cap with glass viewing window.

85°C

6G2 (OG)
Ceramic block with brass terminals for type 6M and 6N connection heads.
For use with 8 to 14 AWG wires. (See pg. 1-4).

Dimensions:
6G2: H=0.79", W=2.00", D=1.54"

6G4 (OG)
6G4: H=1.15", W=2.00", D=1.54 "

200°C

6B4 (O)
Ceramic block with brass terminal plates for type 6L, 6M, 6N, 6Q, and 6R connection heads. For use with maximum 16 AWG wire. (See pg. 1-4)

Dimensions:
Diameter=1.62", Depth=0.6"

200°C

6B6 (O)
Ceramic block with brass terminal plates for type 6L, 6M, 6N, 6Q, and 6R connection heads. For use with maximum 16 AWG wire. (See pg. 1-4) Temperature rating of 200°C.

Dimensions:
Diameter=1.62", Depth=0.6"

200°C

6C4
6C6
6C8 (OS)
Ceramic block with 304SS terminal posts for type 6L and 6Q connection heads. The terminal posts provide easy access to the wires. For use with max.18 AWG wire.

Dimensions:
Diameter=1.662", Depth=0.995"

200°C

6BB4 (OA)
Bakelite terminal block with nickel plated brass terminal posts for type 6IA and 6ISS connection heads. For use with max. 20 AWG wire. Temperature rating of 130°C.

6BB6 (OA)
Dimensions:
Diameter=1.96", Depth=0.905"

130°C

6PT2
6PT3
6PT4
6PT6
6PT8 (OP)
Unpluggable terminal blocks for easy calibration and removal of sensors. Terminal body is made of 6.6 Polyimide material, with corrosion proof screw clamp parts. For use with 18 AWG to 24 AWG wires. It is standard with 6R and 6I connection heads.

100°C

For more information and details on connection heads and accessories,
visit www.JMS-SE.com/headspecs

PLUGS AND JACKS

Connector bodies are molded of glass-filled thermoset compounds (will not melt) for high strength and dependability. The standard connectors will withstand ambient temperatures to 400°F continuous and 500°F intermittent. High temperature connectors will withstand ambient temperatures to 800°F continuous and 1000°F intermittent. Standard plugs are color coded per ANSI standards. High temperature plugs are color coded rust. High temperature connectors have nickel plated prongs; and therefore, are good for use in corrosive environments. Other high temperature plugs and jacks are made of ceramic material and can be color coded.

Alloys of prongs match ANSI calibrations to maintain sensing accuracy. Alloys and polarity are identified by symbols molded into the body.

#1	DESCRIPTION [6-18, 6-19]	
6A	Accessories plugs and jacks	**Note:** Call JMS for high temp. vacuum applications and multi-pin connectors. Thermocouple plugs are normally two pin and RTD plugs are three pin. See page 6-4 for preferred RTD quick connectors.

#2	CONNECTOR DESIGN	
1*	Standard	<425°F
2	High temperature	<800°F
3*	Heavy duty (solid pin)	<425°F
4*	Heavy duty (jab-in & solid pin)	<425°F (Std size only)
4H	Heavy duty (jab-in & hollow pin)	<425°F (Std size only)
5	Ultra high temperature (glazed)	<1200°F
6*	Low noise	<425°F
7	Ultra high temperature (unglazed)	<1200°F
8	High temperature jab in	< 800 F
9	Locking	< 425°F.

*Add a W suffix to symbol #2 for a write-on window connector. (Example: 1W=Standard connector with write-on window.)

SUPPORT ACCESSORIES FOR PLUGS AND JACKS

TUBE ADAPTER FOR USE WITH PLUG OR JACK ON SHEATH
Nickel plated steel construction compression fitting. Always used with high temp. connectors and dual connectors mounted to sheath, may be specified on standard plugs and jacks.

SINGLE	DUAL	OUTSIDE TUBE DIAMETER
6V063SC	6V063D	1/16" (.063")
6V125SC	6V125D	1/8" (.125")
6V188SC	6V188D	3/16" (.188")
6V250SC	6V250D	1/4" (.250")

ROUND SINGLE CIRCUIT PANEL JACK
Designed for mounting into an instrument case or control panel from the front. Standard fits in a 1.125"Ø cutout and mini fits in a 0.750 Ø cutout. Polarity marked and color coded for identification.

6RSC (Standard)
6RMCR (Mini)

MAX. TEMP. 400°F
JACK NOT INCLUDED

CABLE CLAMP FOR USE W/ PLUG & JACK WITH LEAD WIRE
Nickel plated steel. For cable up to 3/8" diameter. Always used to support plug mounted on wire lead.

6H Cable Clamp

PANEL ADAPTER

6ACL Panel adapter
JACK NOT INCLUDED

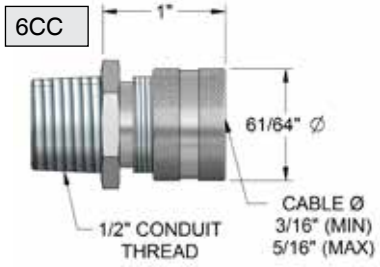
WATER RESISTANT NEOPRENE BOOT FOR USE WITH PLUG AND JACK
MAX. TEMP. 212°F

6WPBM Mini plugs & jacks

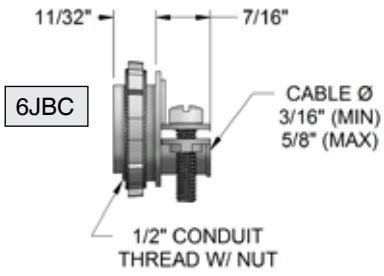
6WPB Standard sized plugs & jack
Flexible moisture proof boot for connector and wire connection.

SUPPORT ACCESSORIES

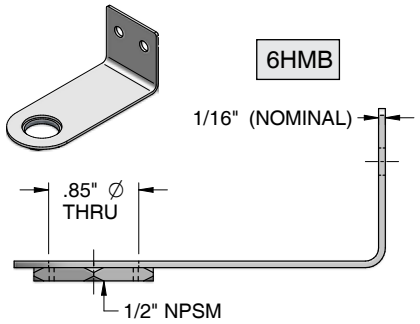
CORD CONNECTOR FOR USE WITH ATTACHING HEAD ASSEMBLIES & FLEX ARMOR



JUNCTION BOX CONNECTOR



HEAD MOUNTING BRACKET



Note: Standard cord connectors are aluminum. Other sizes and materials are available.

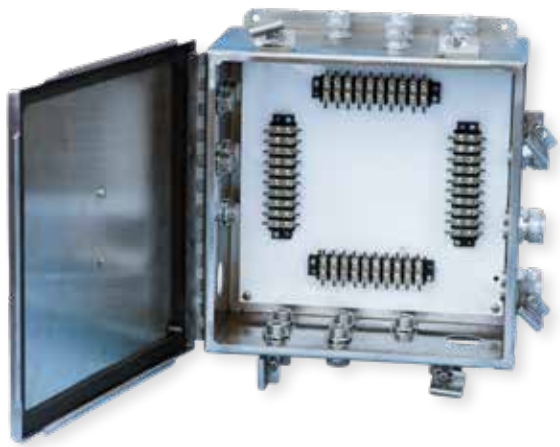
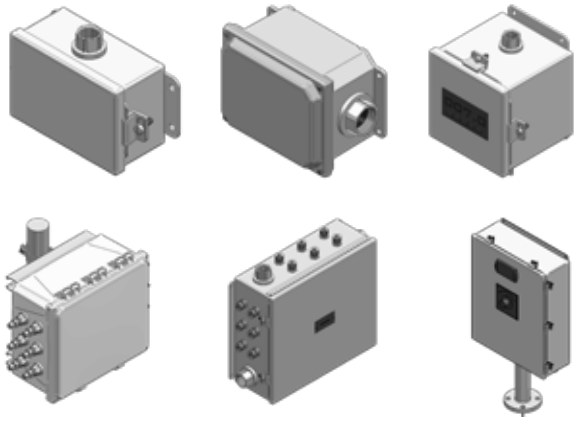
CUSTOM ENCLOSURE ASSEMBLIES





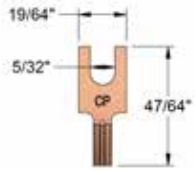
Custom enclosures are available. JMS will generate a drawing for your assembly including transmitters or compensated terminal strips. Contact JMS Southeast, Inc. for your custom design.

SPADE LUGS

Spade lugs are offered in compensating alloys. Spade lugs accept 18 gauge wire or smaller for crimp connections. Each lug has stamped-in designation of thermocouple alloy type.

#1	DESCRIPTION
6SL	Spade lug

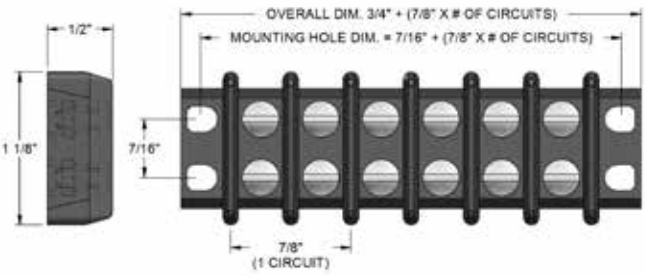
#2	THERMOCOUPLE ALLOY		
AL	Alumel	NN	Nisil
CH	Chromel	NP	Nicrosil
CO	Constantan	X	Other, specify
CP	Copper		
IR	Iron		



TERMINAL STRIPS

JMS terminal strips are manufactured of general purpose glass-filled Nylon and will withstand temperatures from 40°F to 400°F. Fasteners are nickel-plated brass. JMS recommends that thermocouple terminal lugs be ordered with this item.

#1	DESCRIPTION		
6TS	Terminal strip		
	#2	# OF CIRCUITS	
	#	Number of circuits (4 screws = 1 circuit)	
		#3	TYPE (Leave blank to omit terminals)
		____	J,T,K,E,N,R (use R for RTDs & PT T/Cs)



Note: There is a maximum of 10 circuits per strip.

TERMINAL LUGS

Terminal lugs are available in thermocouple compensating alloys. They are intended for use with JMS Southeast terminal strips. Each lug is marked with thermocouple alloy.

#1	DESCRIPTION
6TL	Terminal lug

#2	THERMOCOUPLE ALLOY		
AL	Alumel	NN	Nisil
CH	Chromel	NP	Nicrosil
CO	Constantan	X	Other, specify

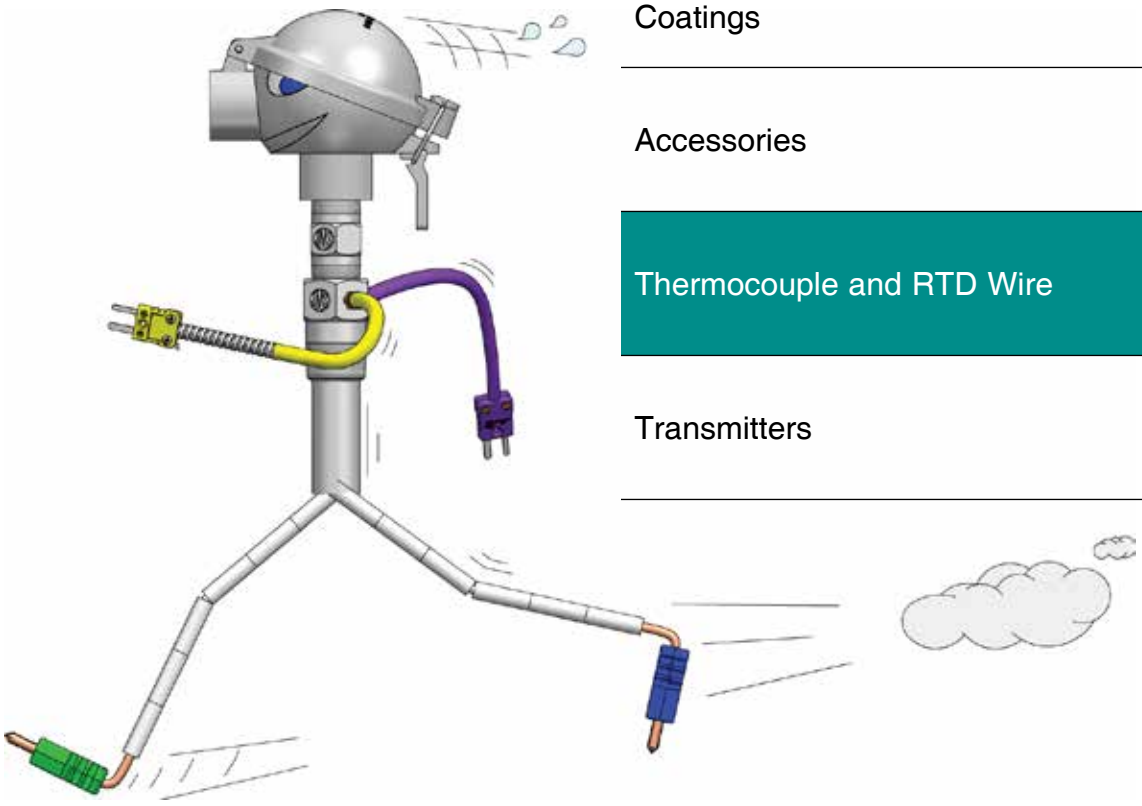
Swifty Sensor



Due to space limitations we have excluded some part number selections from publication. Additional selections are available via JMS catalog cut sheets posted at www.JMS-SE.com. It is the final reference for JMS part numbers. Custom products are also available with drawings to suit your application. Call 1-800-873-1835 or email Sensors@JMS-SE.com for more information.

THERMOCOUPLE WIRE

#1	DESCRIPTION [7-5 through 7-17]
7	Thermocouple wire (measured in feet)

#2	TYPE		
EXTENSION GRADE [10]	THERMOCOUPLE GRADE [9]	TYPE	
JX	J	Iron/Constantan	
KX	K	Chromel/Alumel	
TX	T	Copper/Constantan	
EX	E	Chromel/Constantan	
NX	N	Nicrosil/Nisil	
RX	--	Copper/#11 Alloy	
SX	--	Copper/#11 Alloy	
BX	–	PCLW 630/Copper (special order only)	
2X	–	Copper/Copper	
CX	–	A405/A426	

Note: For special limits of error thermocouple wire, use a double calibration symbol. (Example: JJ for Type J special limits). Polyvinyl Chloride (PVC) wire and type R,S, B, and C fiberglass wire are ordinarily manufactured in extension grade. Kapton, Nylon, Teflon, fiberglass braid, Refrasil, and Nextel are ordinarily manufactured in thermocouple grade.

} It is common practice to use plain Copper wire for type "B" extension. Use 2X from this selection or 2 conductor RTD wire. (Ex. 7RTT2242N)

Extension Grade Only

#3	INSULATION [7-5] [7-6]	Temperature Range (°C)
PP*	Polyvinyl Chloride(PVC)	-29 to 105
PC	Polyvinyl Chloride(PVC) rip cord	-29 to 105
PA*	Polyvinyl Chloride(PVC) w/ twisted conductors Aluminum Mylar shield & drain wire	-29 to 80
KK*	Kapton	-200 to 288
NN	Nylon	-200 to 177
TF*	Fused Teflon	-200 to 260
TT*	Extruded Teflon	-200 to 200
HT	Hi-temp Teflon	-200 to 285

		Temperature Range (°C)
GG*	Fiberglass braid	25 - 482
GS*	Fiberglass braid with SS overbraid	25 - 482
HG*	High temperature fiberglass braid	25 - 705
HS*	High temperature fiberglass braid with SS overbraid	25 - 705
RR	Refrasil	25 - 871
SI	Siloflex	25 - 982
NE*	Nextel - Heavy weave (for light weave, use X and specify lower weave #)	25 - 1204
X	Other, specify	

*Standard stock items in 20 AWG. Other insulation and sizes available.

#4	WIRE SIZE		
16	16 AWG	28	28 AWG
20	20 AWG (Standard)	30	30 AWG
24	24 AWG	X	Other, specify

#5	WIRE CONSTRUCTION

NON-INSULATED SINGLE CONDUCTOR THERMOCOUPLE WIRE

#1	DESCRIPTION [7-11]
7N	Non-Insulated thermocouple wire

#2	TYPE				
JP	Iron	NN	Nisil	BP*	Platinum 30% Rhodium
JN	Constantan	TP	Copper	BN*	Platinum 6% Rhodium
KP	Chromel	TN	Constantan	CP*	Tungsten 5% Rhenium
KN	Alumel	SP*	Platinum 10% Rhodium	CN*	Tungsten 26% Rhenium
EP	Chromel	SN*	Platinum	AP*	Tungsten 5% Rhenium
EN	Constantan	RP*	Platinum 13% Rhodium	AN*	Tungsten 20% Rhenium
NP	Nicrosil	RN*	Platinum		

*Unit of Measure = inches

#3	WIRE SIZE			
8	8 AWG	24	24 AWG	(JMS standard for CP, CN, SP, SN, RP, RN, BP, & BN)
14	14 AWG	26	26 AWG	
16	16 AWG	28	28 AWG	
20	20 AWG	30	30 AWG	
		X	Other, specify	

Note: See www.JMS-SE.com for weight per unit of measure

MULTI-CONDUCTOR EXTENSION CABLE

Each conductor is insulated with Polyvinyl Chloride (PVC) or Teflon. An aluminum backed Mylar™ tape serves as an electrostatic shield. A solid 20 gauge tinned-copper drain wire is over the bundle in direct contact with the aluminum/mylar shield, thus minimizing any stray EMFs. Conductors are color coded and numbered for identification. All conductors are insulated with an outer jacket of polyvinyl chloride or Teflon insulation approximately .0245" thick. Multipair extension cable can be manufactured with various quantities of pairs and insulation types. Contact JMS Southeast sales office for any requirements you may have.

#1	DESCRIPTION [7-5 through 7-17]
7M	Multi-conductor extension cable

#2	TYPE	Unit of Measure = Feet
J	Iron/Constantan	
K	Chromel/Alumel	
T	Copper/Constantan	
E	Chromel/Constantan	
R	Copper/#11 Alloy	
S	Copper/#11 Alloy	
B	PCLW 630/Copper	
2	2 wire RTD (commonly used for type B thermocouples)	
3	3 wire RTD	
4	4 wire RTD	
X	Other, specify	

Note: Standard thermocouple conductors are solid 20 AWG, standard RTD conductors are stranded 24 AWG.

#3	# OF PAIRS	NOMINAL OD	EST. SHIPPING WT. LBS. PER 1000 FEET
2	2	.370	53
4	4	.390	80
8	8	.480	131

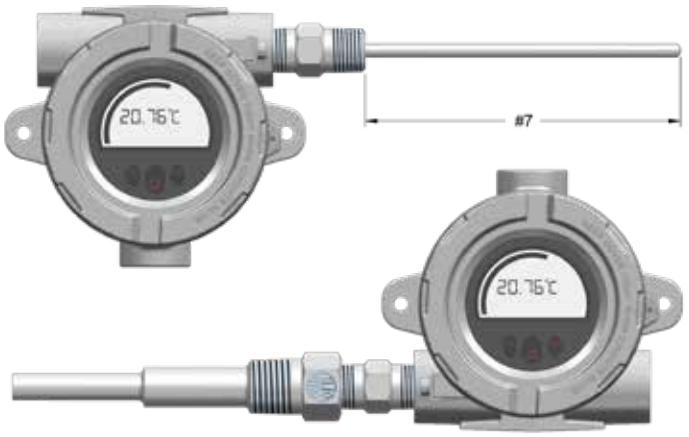
INDICATING TRANSMITTER ASSEMBLIES

JMS offers transmitters of all makes & models (JMS, Rosemount, Honeywell, ABB, Siemens, E+H & More!). Here are just a few of the transmitters JMS has to offer:



SERIES 8PA

(See section 5 for thermowell ordering specifications)

The 88 series specified with these ordering symbols includes a single element temperature sensor assembly with a JMS indicating transmitter that is isolated, intrinsically safe, Hart Programmable and Ex rated to FM, CSA, IECEx, ATEX standards and more, or another transmitter of your choosing. Sensors have a .250" diameter and stainless steel jacket. Thermocouples have ungrounded junctions. RTD sensors are rated up to 662°F (350°C) and thermocouples are rated to as high as 899°C (1650°F) depending on thermocouple type. The most popular assembly features a spring-loaded fitting with a thermowell as shown above.

#1	DESCRIPTION [18]		
88	Transmitter (Includes sensor, housing, and digital indicator).		
#2	TYPE OF TRANSMITTER [8-18]		
PA	JMS Transmitter, Aluminum Housing	GA	ABB TTH300 (FM certified) w/ indicator & AL Ex Proof windowed housing
PS	JMS Transmitter, Stainless Steel Housing		
X	Non-JMS Transmitter (state make and model)	GS	ABB TTH300 (FM certified) w/ indicator & SS Ex Proof windowed housing

#3	SENSOR TYPE (SINGLE INPUT) 3= 3 WIRE 100 Ω RTD 4= 4 WIRE 100 Ω RTD

T	Copper/Constantan thermocouple	C	Tungsten 5% Rhenium/Tungsten 26% Rhenium T/C
K	Chromel/Alumel thermocouple	2	100Ω, Platinum, a=0.00385, RTD, 2 Wire
E	Chromel/Constantan thermocouple	3	100Ω, Platinum, a=0.00385, RTD, 3 Wire
S	Platinum 10% Rhodium/Pure Platinum thermocouple	4	100Ω, Platinum, a=0.00385, RTD, 4 Wire
R	Platinum 13% Rhodium/Pure Platinum thermocouple	X	Other, specify
B	Platinum 6% Rhodium/Platinum 30% Rhodium T/C	Z	N/A

Note: DIN rail style(8R) available for all isolated transmitter types.

#4	TEMPERATURE RANGE		
_ to _°C	List desired temperature span	X	Other, specify
_ to _°F	List desired temperature span	Z	N/A (customer to span)

#5	OUTPUT		
1	1 to 5 VDC	F	Fieldbus
4	4 to 20 mA	X	Other, specify
P	Profibus		

#6	SOFTWARE & CABLES INCLUDED?
A	Yes
Z*	No

*Standard for I, E, & D type transmitters.

#7	PLUG IN INDICATION		
P*	Yes	Z	No

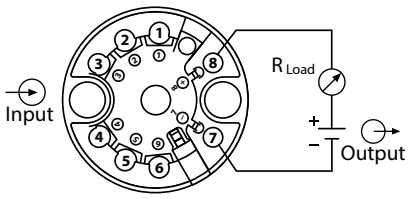
* Only available with "puck" style models I, E, or D in selection #2.

#8	OPTIONS & HOUSINGS (Leave blank if none)
L	Aluminum with hinged cover NEMA 4 (6L)
I	Aluminum, NEMA 4X, FM, CSA, IP66 (6IA)
M	Aluminum with screw cover and chain NEMA 4 (6M)
C	Calibration at 3 points

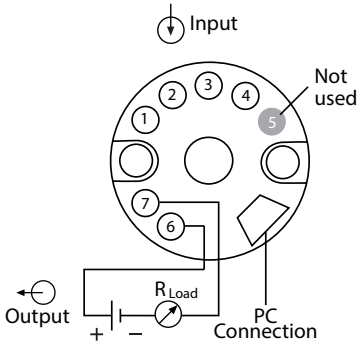
See Heads section on page 1-7 for additional options

TRANSMITTER WIRING DIAGRAMS

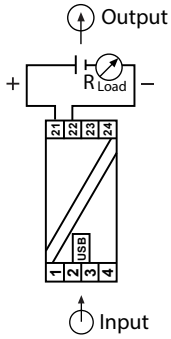
8I & 8E & 8D



8N & 8H



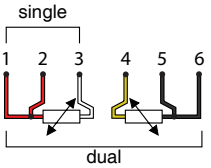
8R



Notes:

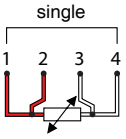
- Dual RTD input is not available for all transmitters.
- Some terminals will not be used as shown.
- Contact JMS for additional wiring diagrams not shown.

RTD 3-WIRE CONNECTION

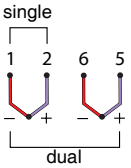


(Dual input not available for 8H, 8N or 8R)

RTD 4-WIRE CONNECTION



THERMOCOUPLE



(Dual input not available for 8H, 8N or 8R)

JMS NOW OFFERING TURNAROUND SERVICES

You pull or point us to them. We Check, Spec and Req(uisition) them.

Many plants go into a turnaround and have to pull temperature sensors that may not have been replaced in years. What is in the field may or may not meet the latest standards. The data sheet may offer little more information than "type K thermocouple with steel thermowell". Wire colors may have long ago faded or been covered with gunk and gathering the details necessary to order a matching sensor in a timely manner that is going to have you up and running before the deadline arrives can be challenging to a crew that is already pressed for time.

In such cases JMS has sent personnel on site to "check, spec and req" the temperature sensors and thermowells pulled from the field. This means that a JMS temperature expert examines the sensor and thermowell you pull out, takes pictures, and compares it to the latest ASME and ASTM requirements. In other cases it means we climb towers and perform on site PMI testing, wall thickness testing, wake frequency calculations and create a JMS part number so that the perfect part can be shipped to your site on an expedited basis. A drawing is generated for your records so that the next time you turn around that item you have no question as to what has been installed -- you can order by drawing number and have every possible detail you need to make working with that sensor as easy as pie.

Could **JMS Turnaround Services** be the perfect cure for a common turnaround headache?
Call JMS today at **800-873-1835** to learn more.

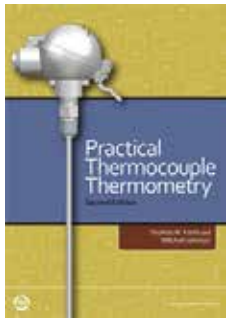
COME TO STATESVILLE AND BECOME THE CREDENTIALED TEMPERATURE EXPERT AT YOUR FACILITY.



JMS Southeast Inc. is producing its 30th annual course on Industrial Temperature Measurement. Hundreds of Technicians, Engineers, Designers, Salesmen, and Integrators have attended and complimented this one day course. It is designed to familiarize the attendee with the basics and details of temperature measurement as practiced in industry today. It covers calibrations, accuracy, tolerances, standards, specifications, and response times. Through a proper circuit and application analysis, you will be able to troubleshoot any problem with either contact and/or non-contact sensors. The course is based on the books "Industrial Temperature Measurement" written by T.W. Kerlin, Ph.D. and R. L. Shepard who were the original instructors of this course and "Practical Thermocouple Thermometry (2nd Ed.)" by T.W. Kerlin, Ph.D. and Mitchell Johnson.

You will receive a free laser infrared thermometer with advanced registration.
Call **(800) 873-1835** or go to **www.jms-se.com** for course registration details.

We have all the info you need, just give us a buzz.
