Policy Statement Regarding Conflict Minerals

JMS Southeast, Inc. (“JMS”) supports ending the violence and human rights violations in the mining of certain minerals from a location described as the “Conflict Region”, which is situated in the eastern portion of the Democratic Republic of the Congo (DRC) and surrounding countries. JMS is committed to meeting all legislative and regulatory requirements that seek to eradicate this suffering.

Tracing the origin and chain of custody of minerals throughout a global supply chain is a complex process. This can only be accomplished with the cooperation and support of a vast number of industries and public and private stakeholders. JMS continues to work aggressively with its suppliers, industry groups and other stakeholders to develop and implement systems and policies that reduce the risk that minerals in our supply chain come from mines that finance or benefit armed groups in the DRC region. To this end, JMS expects its suppliers to acquire minerals only from responsible sources.
